# DIAGRAM OF THE CAUSES OF MORTALITY

2.  
APRIL 1855 TO MARCH 1856.

1.  
APRIL 1854 TO MARCH 1855.

*The Areas of the blue, red, & black wedges are each measured from the centre as the common vertex.*

*The blue wedges measured from the centre of the circle represent area for area the deaths from Preventible or Mitigable Zymotic diseases, the red wedges measured from the centre the deaths from wounds, & the black wedges measured from the centre the deaths from all other causes.*

*The black line across the red triangle in Nov<sup>r</sup> 1854 marks the boundary of the deaths from all other causes during the month.*

*In October 1854, & April 1855, the black area coincides with the red; in January & February 1856, the blue coincides with the black.*

*The entire areas may be compared by following the blue, the red & the black lines enclosing them.*

# What can we learn?

- Be relevant – know your audience

## These former Obama strongholds sealed the election for Trump

By Kevin Uhrmacher, Kevin Schaul and Dan Keating

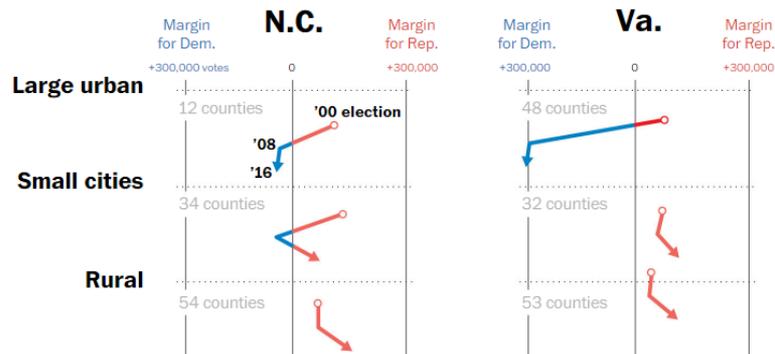

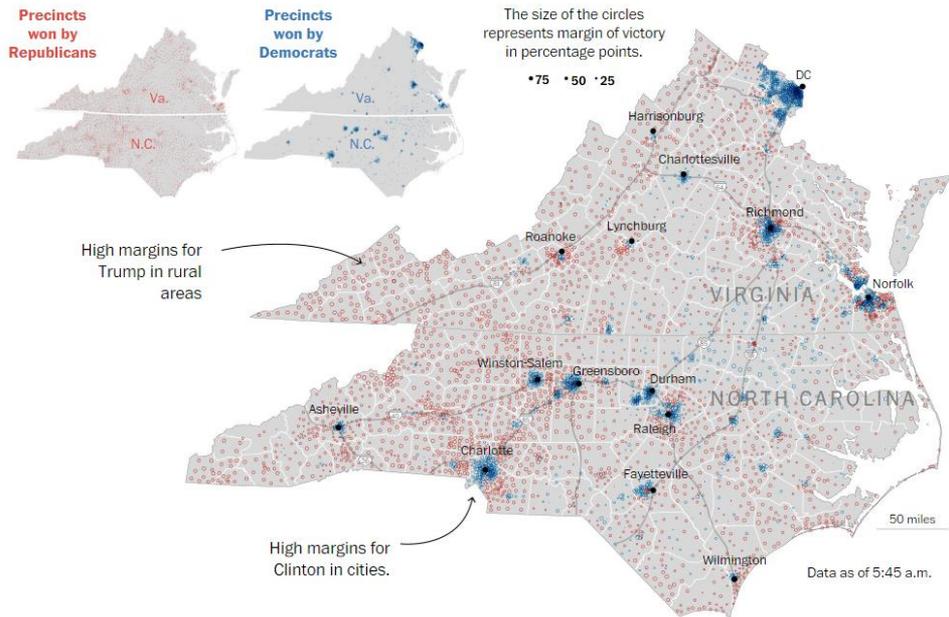

Nov. 9, 2016

Trump counties where: ● Obama won twice ● Obama won once

## Two swing states show why Clinton lost

Virginia and North Carolina both show the same pattern: Clinton taking major hits in rural areas without making up for it in cities.

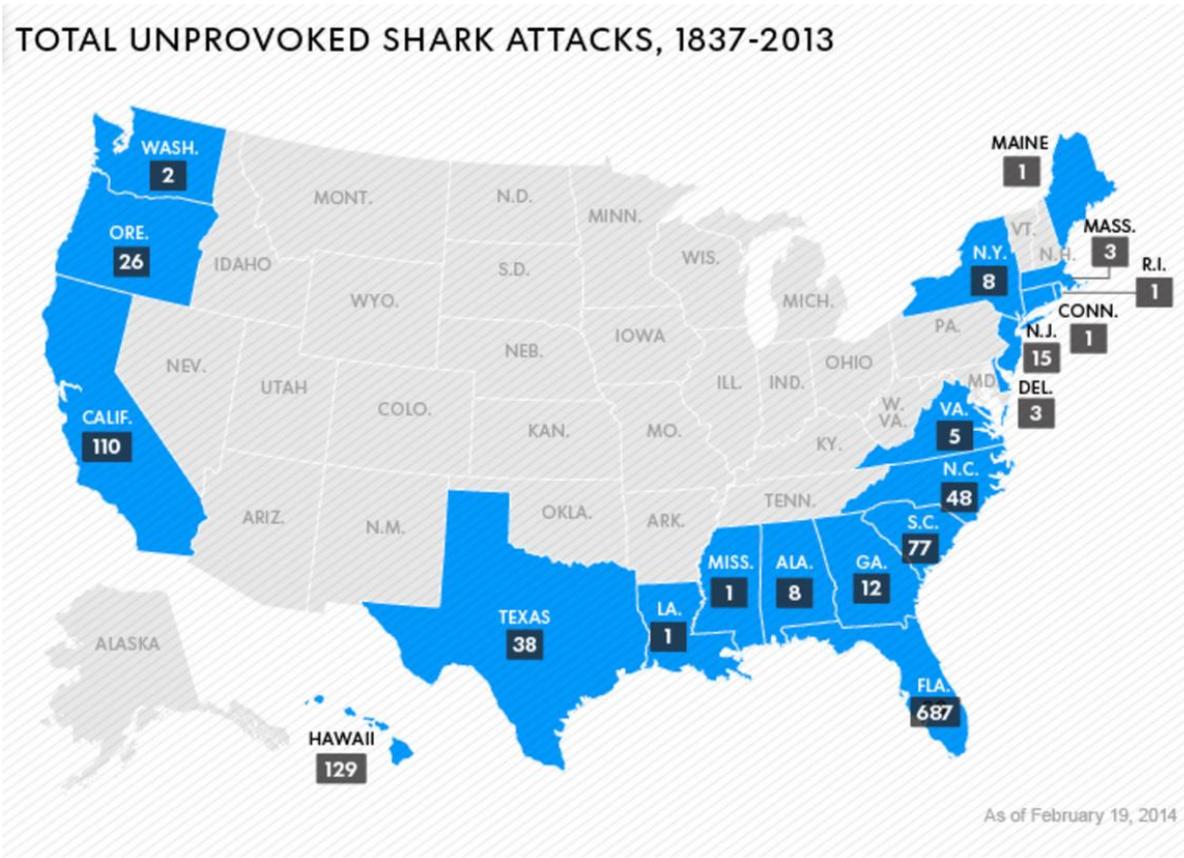

# Maps are great because...

- They are familiar, users feel comfortable
- This means they can focus on the information
- Easy to spot patterns
- Bring in other data and knowledge
- “What is happening in my area?”

# Why Pinellas County is the worst place in Florida to be black and go to public school

By NATHANIEL LASH  
*Times Staff Writer*

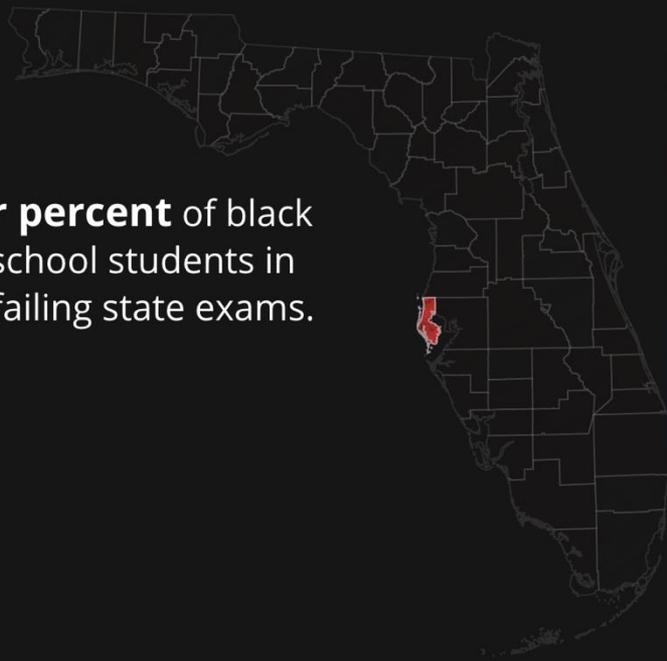

AUG. 12, 2015

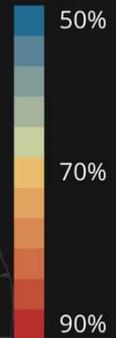

CLICK OR PRESS ↓

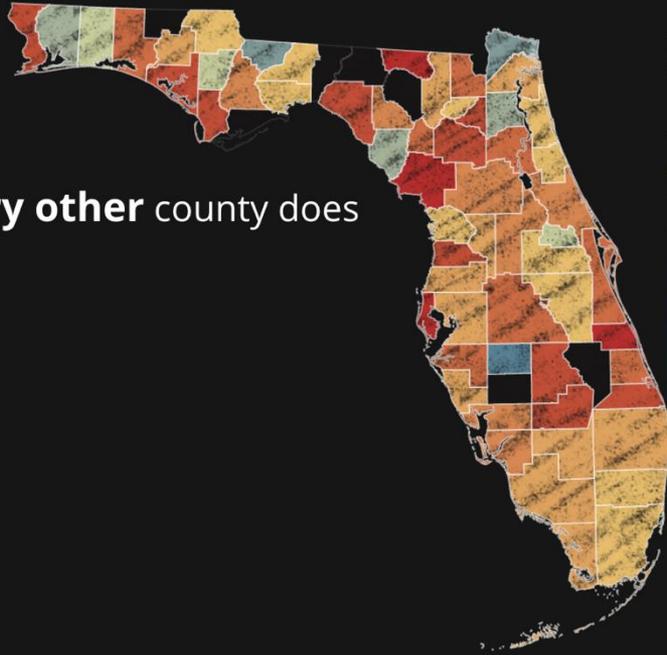

**Eighty-four percent** of black elementary school students in Pinellas are failing state exams.

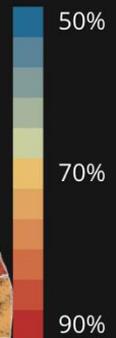

Black elementary students failing FCAT math or reading

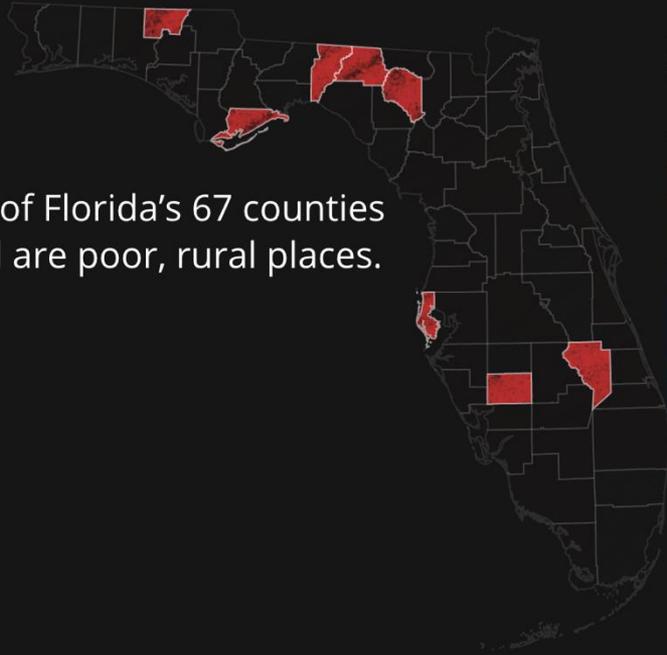

Almost **every other** county does better.

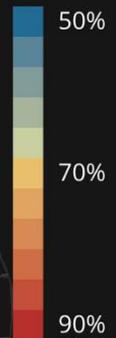

Black elementary students failing FCAT math or reading

Only **seven** of Florida's 67 counties do worse. All are poor, rural places.

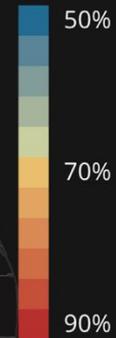

Black elementary students failing FCAT math or reading

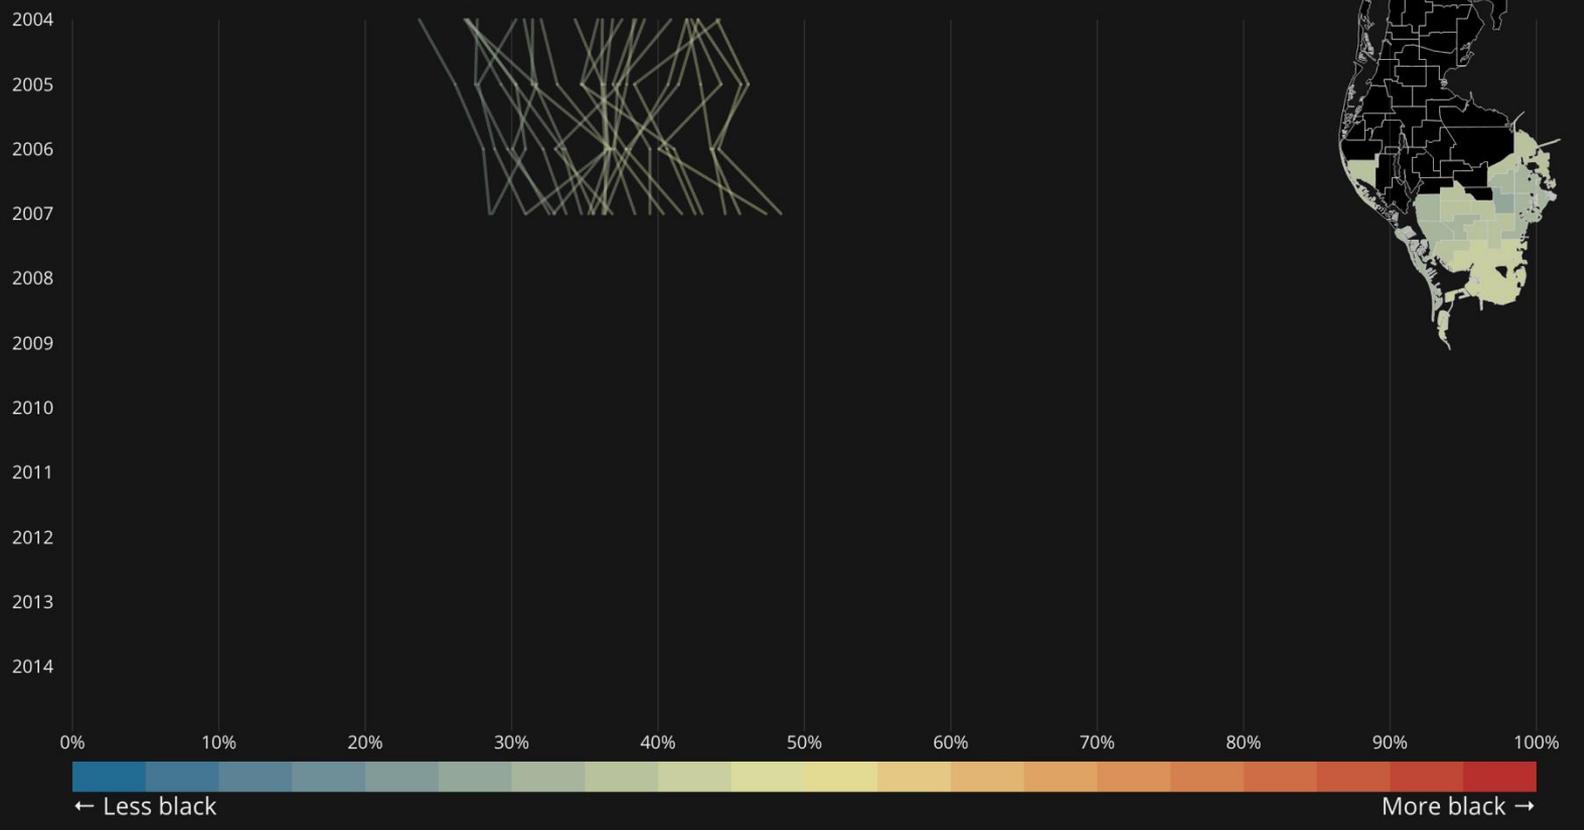

Pinellas has **four times** as many students as all of them combined.

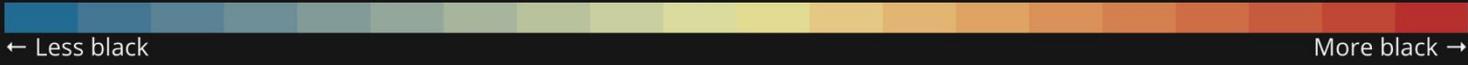

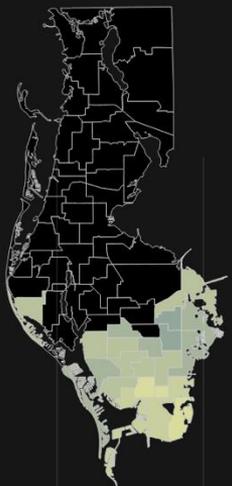

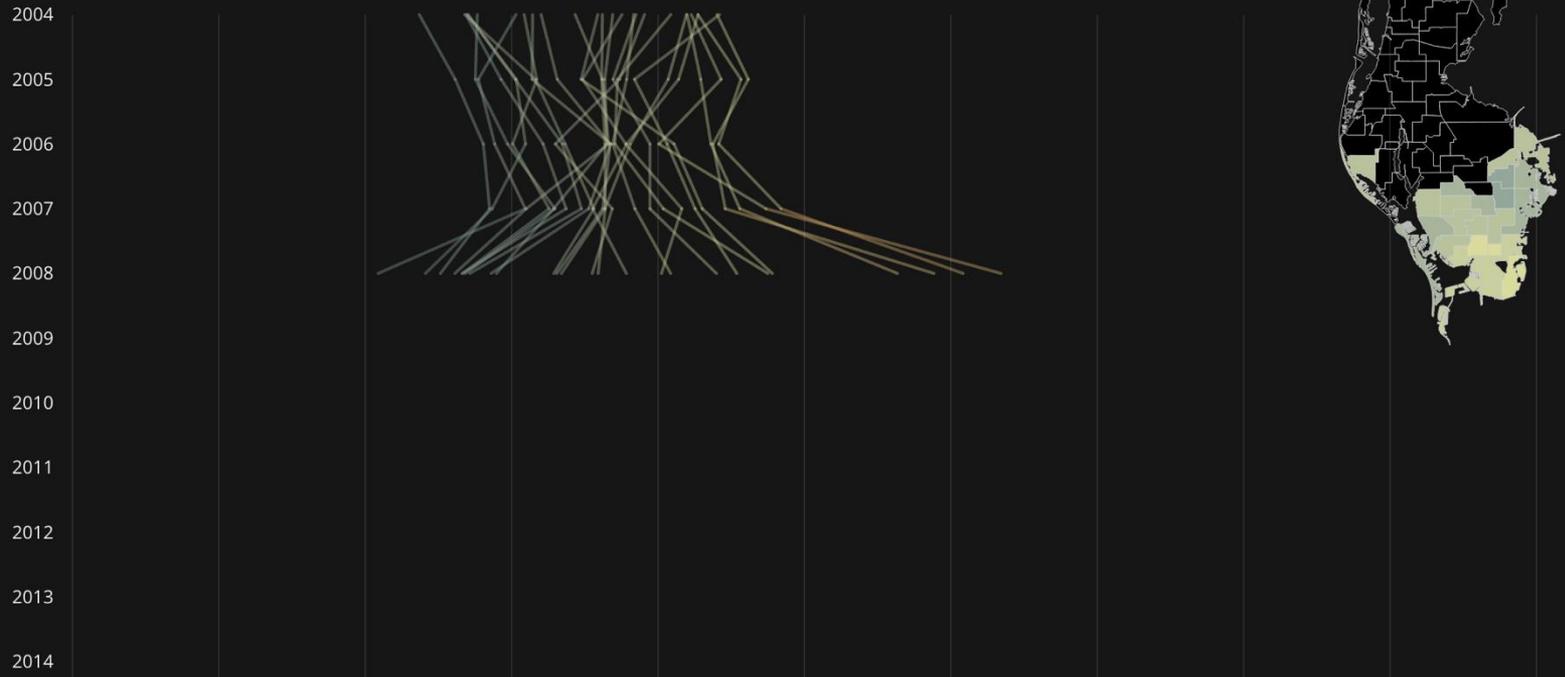

Black elementary students failing FCAT math or reading

Pinellas was much better off in 2007.  
These lines show how **integrated** south  
county elementary schools used to be.

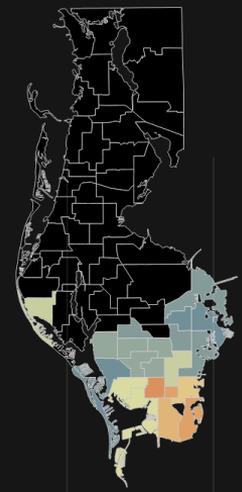

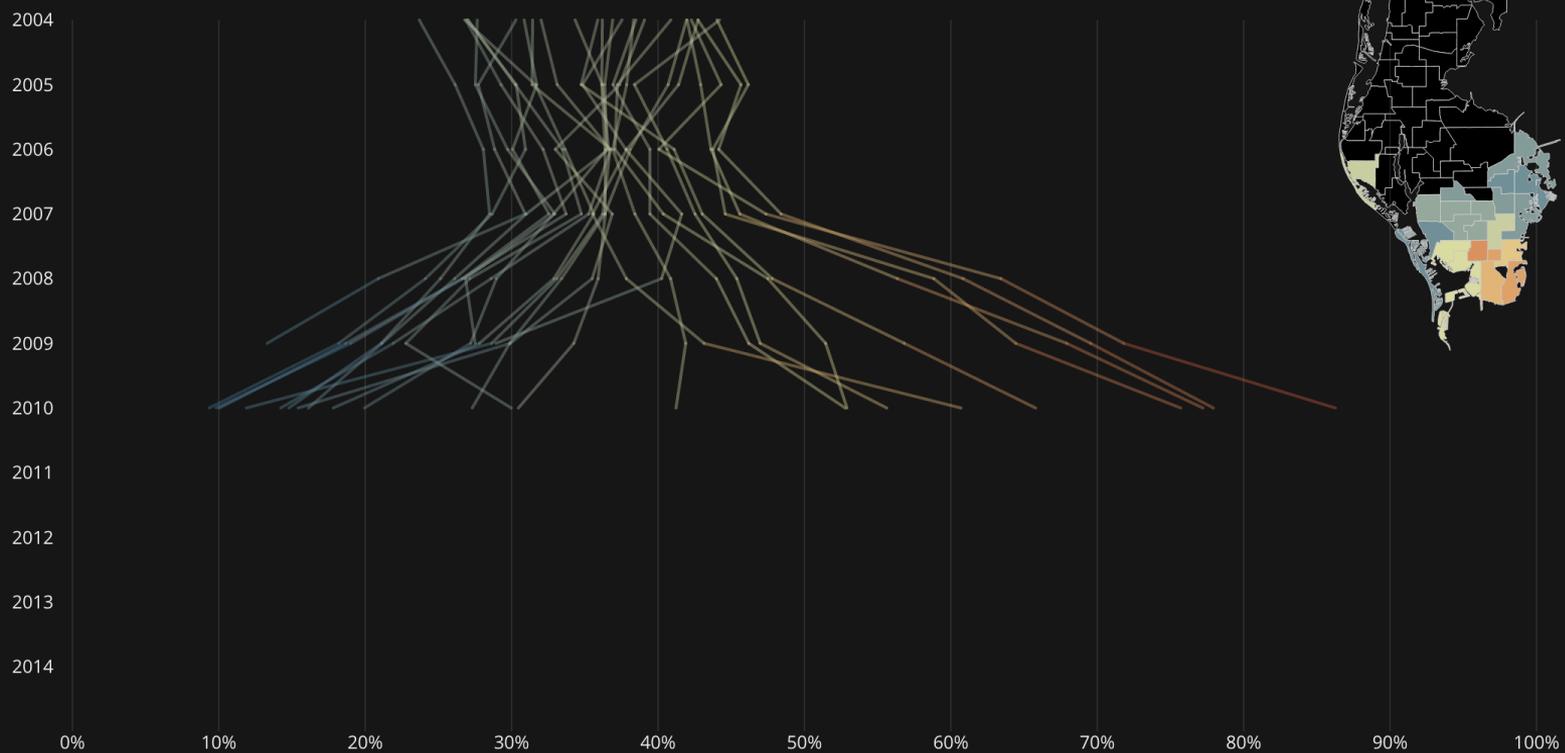

# Then the School Board **abandoned** integration.

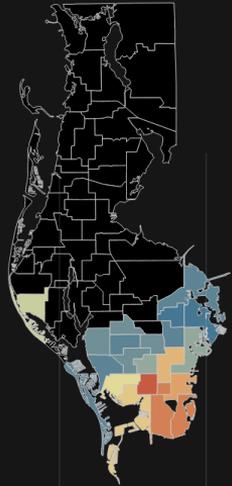

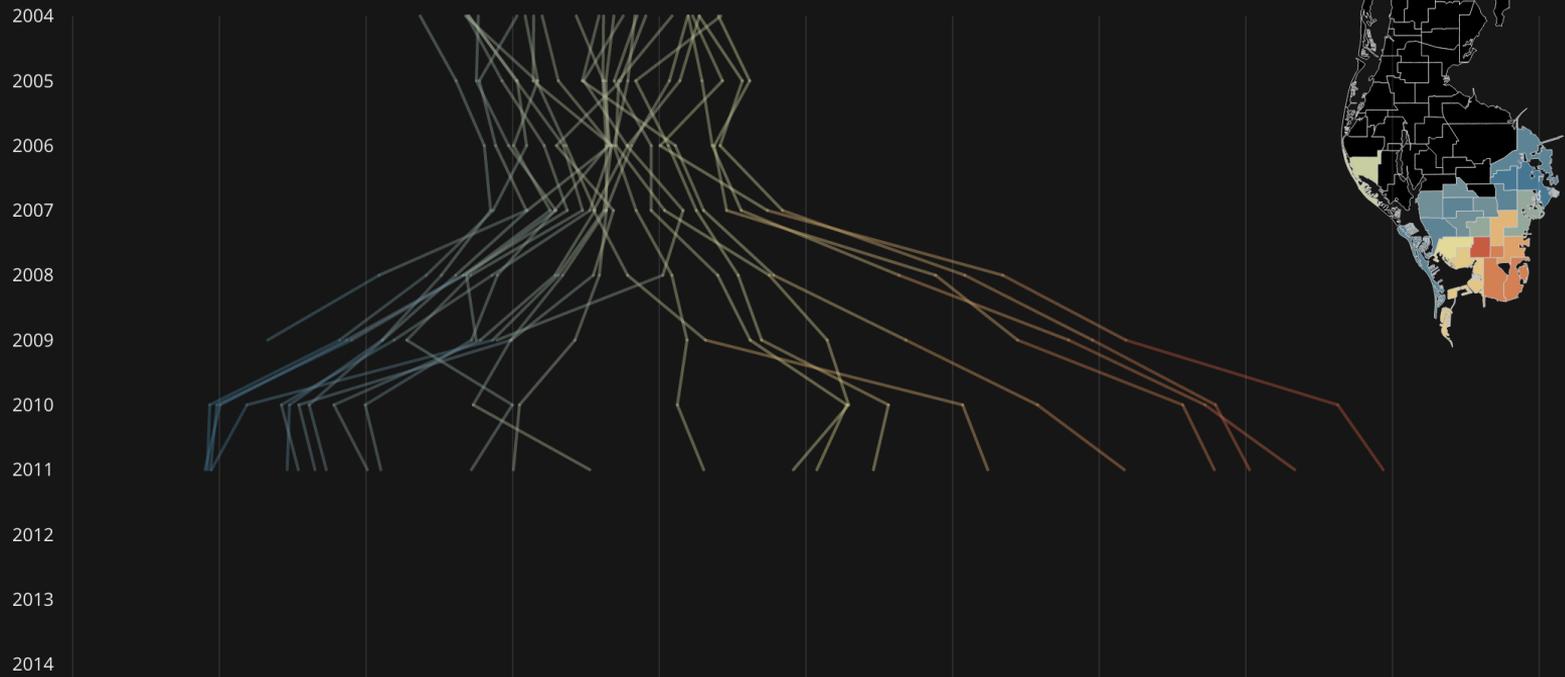

# Five schools changed the most.

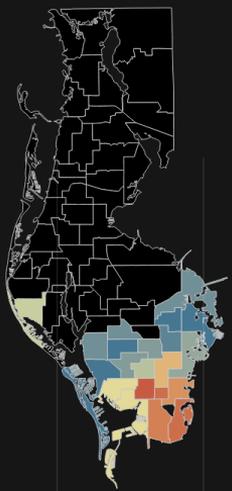

← Less black

More black →

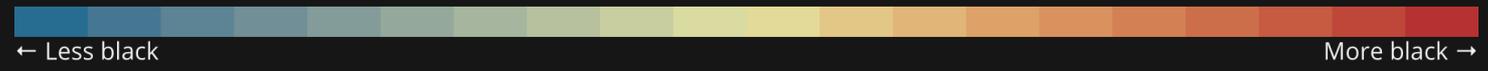

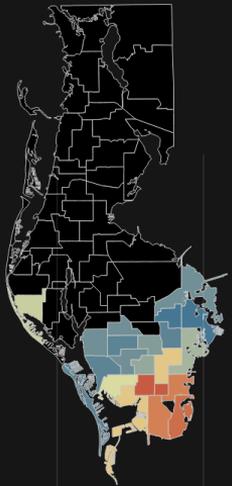

# They became a **little more segregated.**

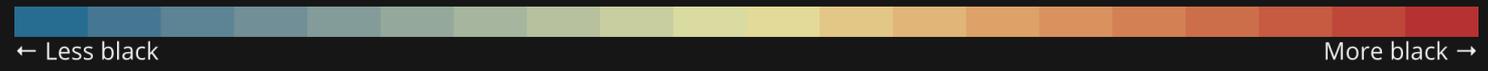

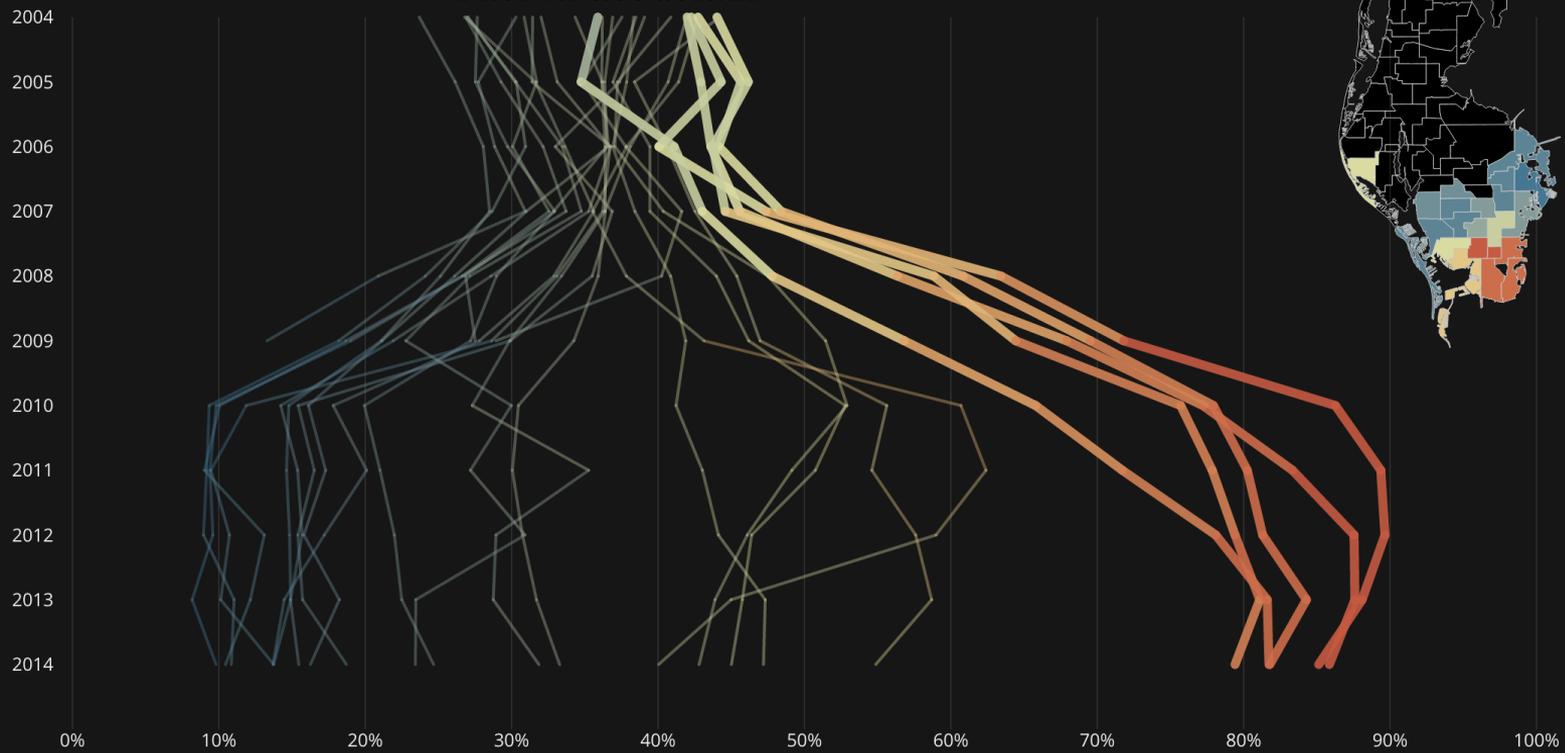

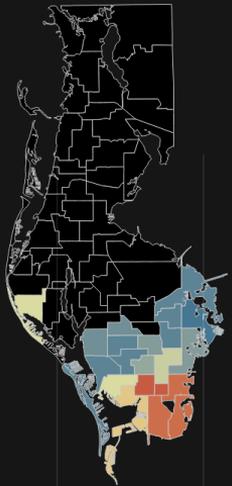

# And a little more segregated.

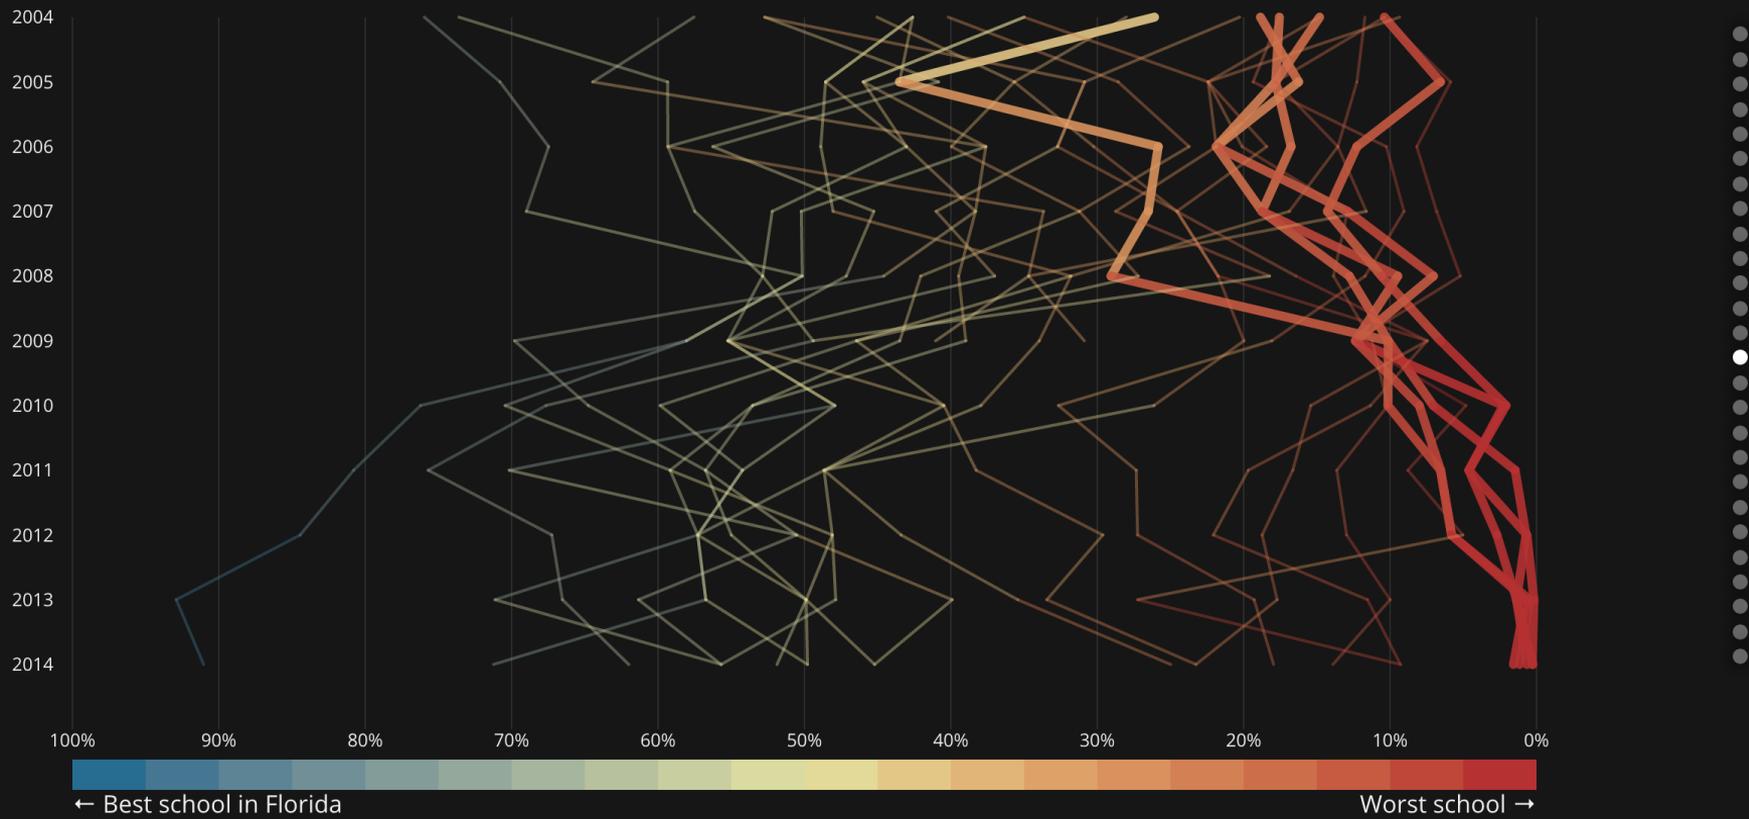

# Until they became **extreme outliers**.

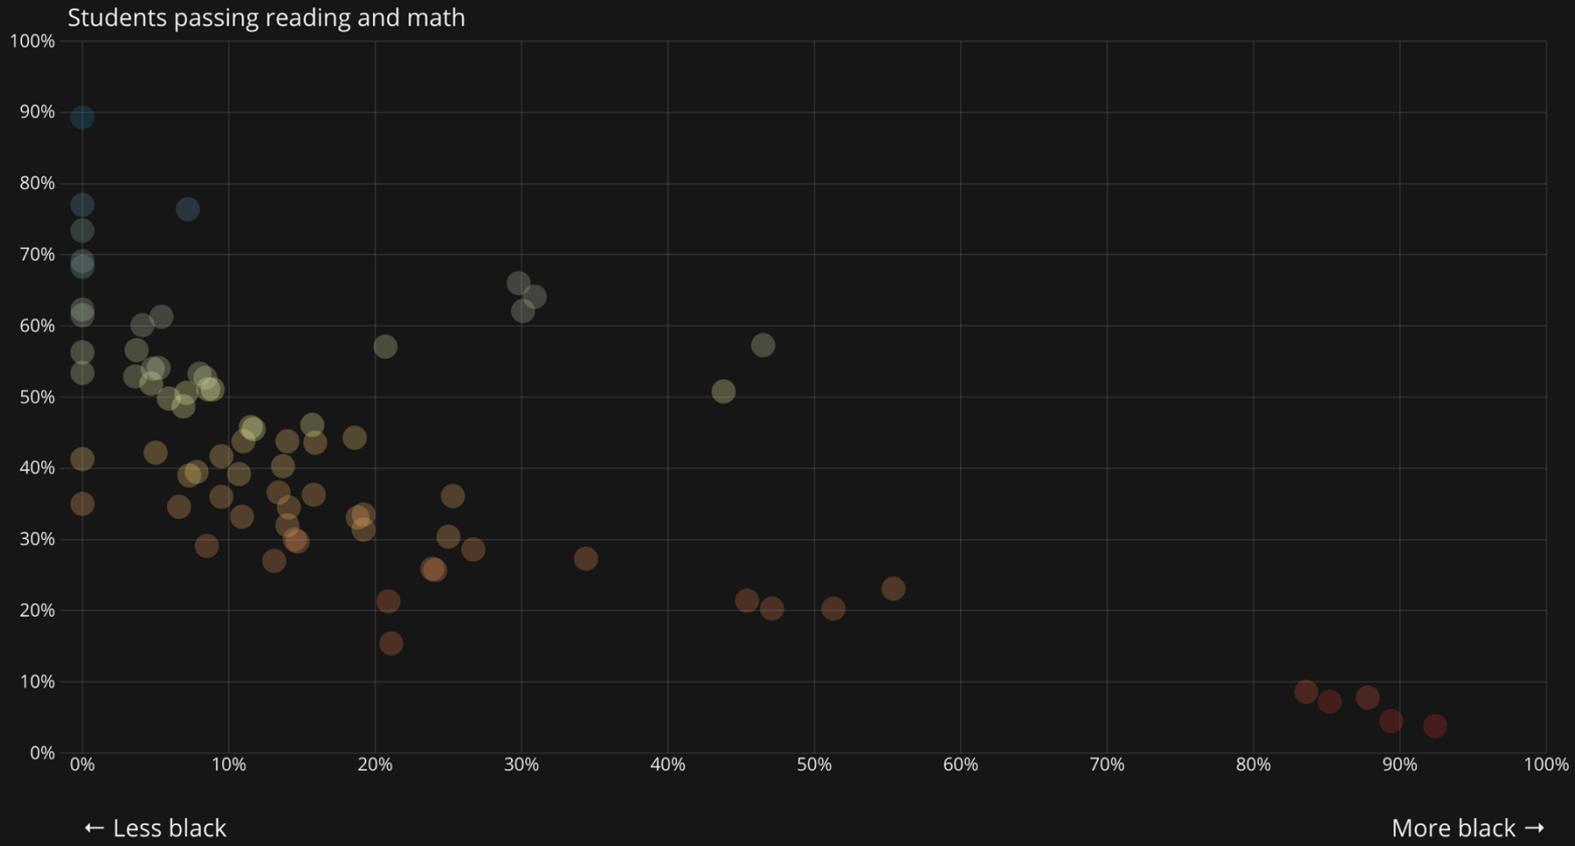

Today, **Campbell Park, Fairmount Park, Lakewood, Maximo** and **Melrose** are the **most segregated** schools in Pinellas.

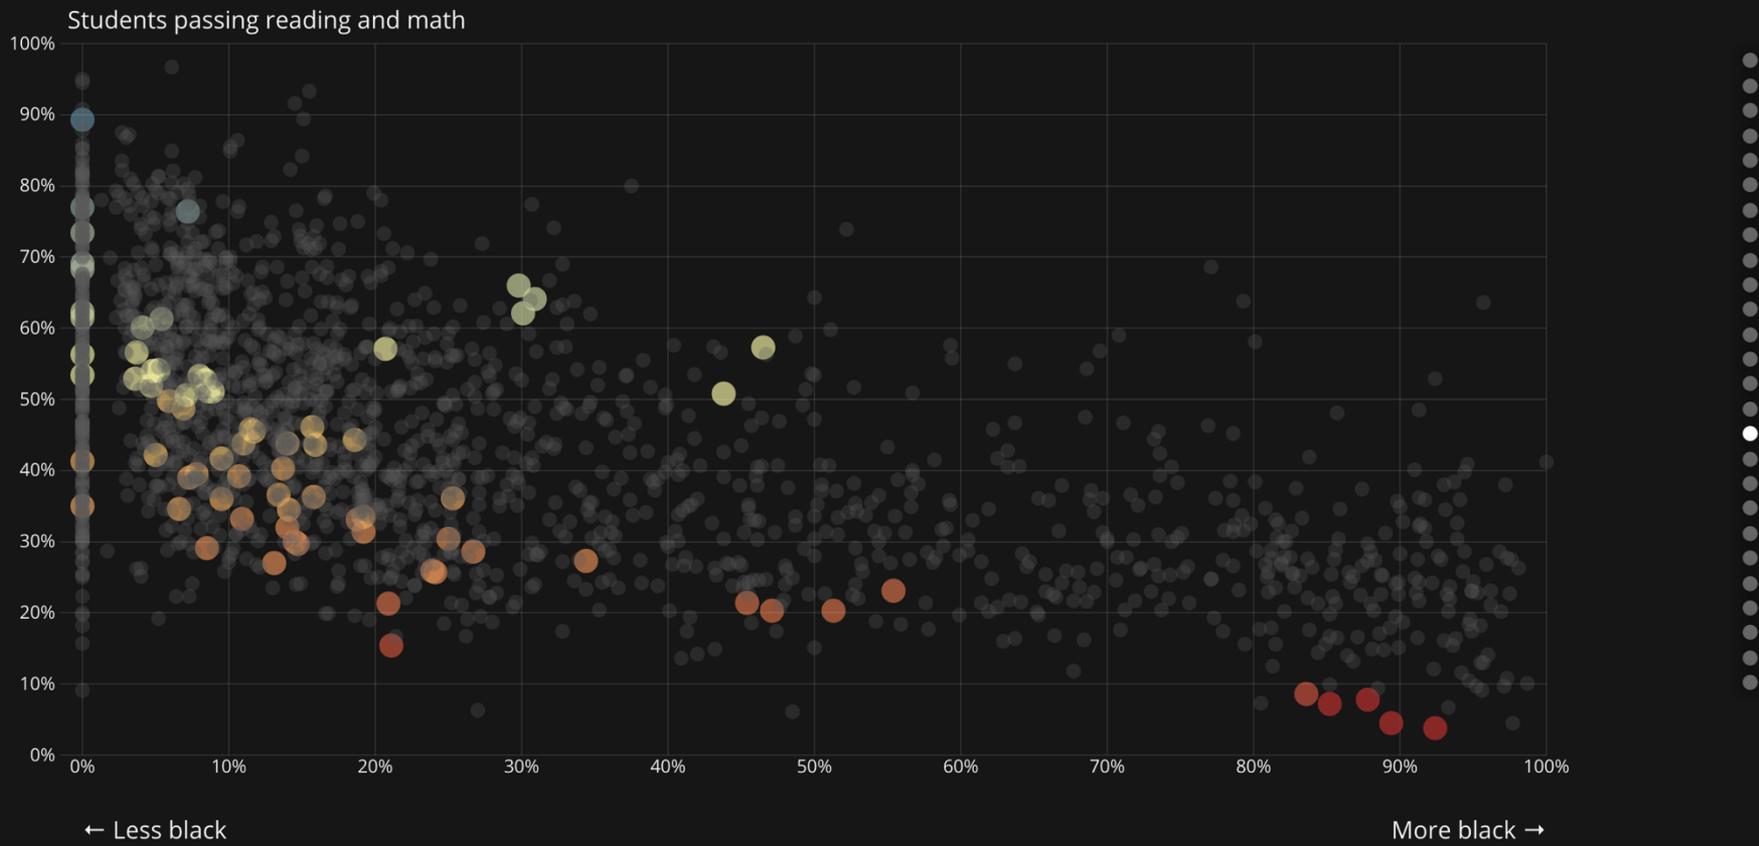

As the schools became **more separate**, they became **less equal**. Their test scores got steadily worse.

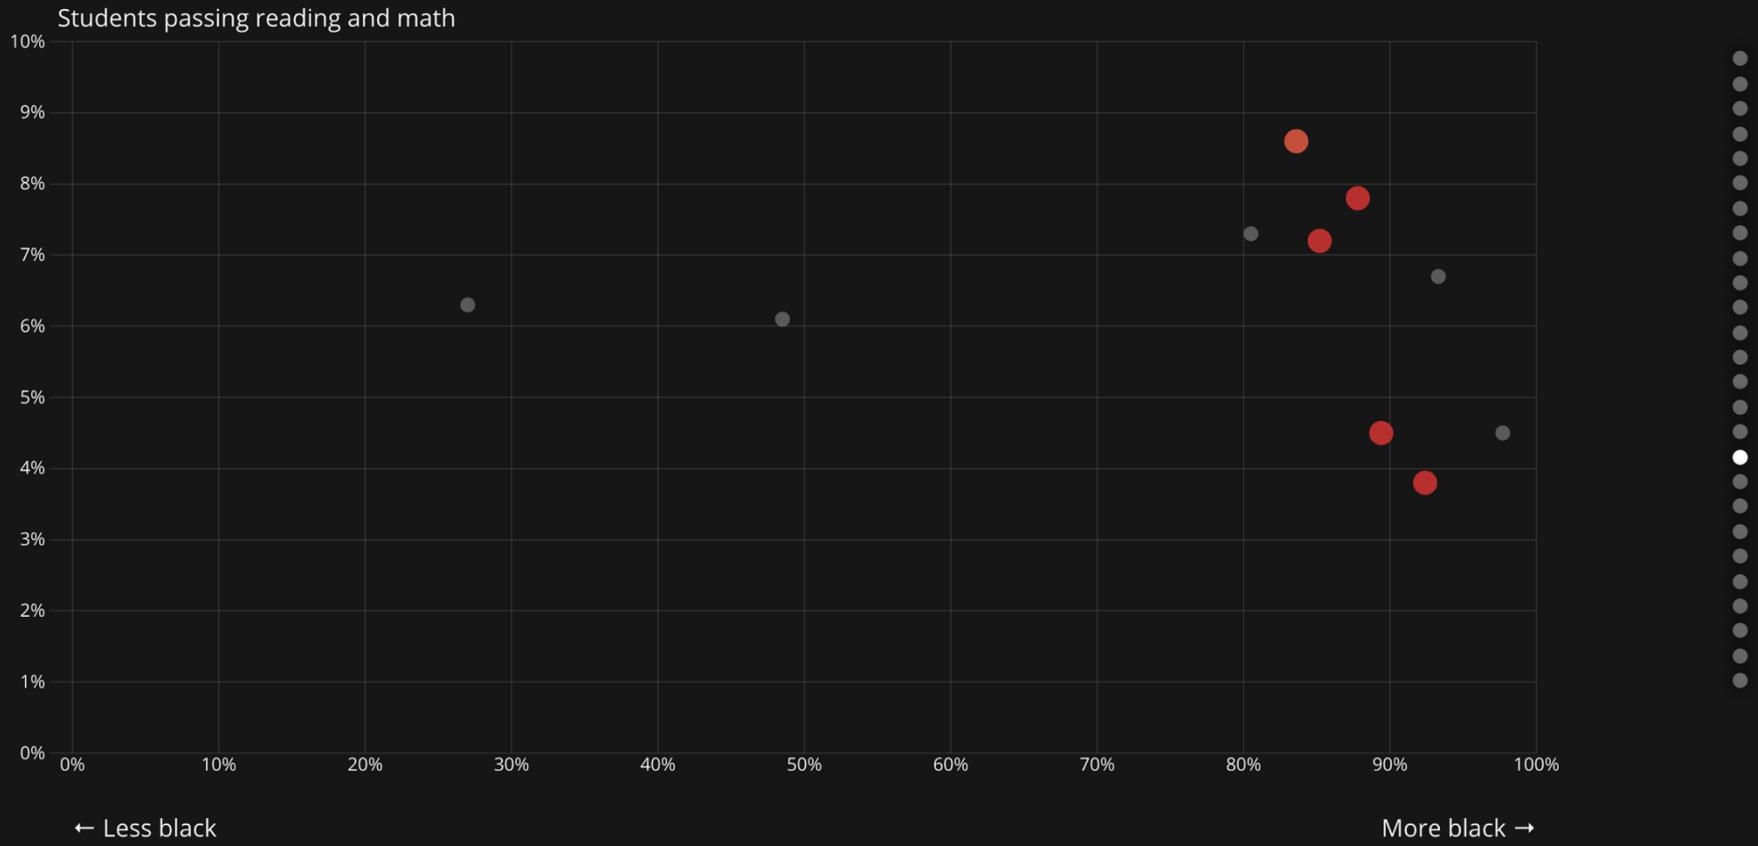

Today they score worse than any school in the **county**.

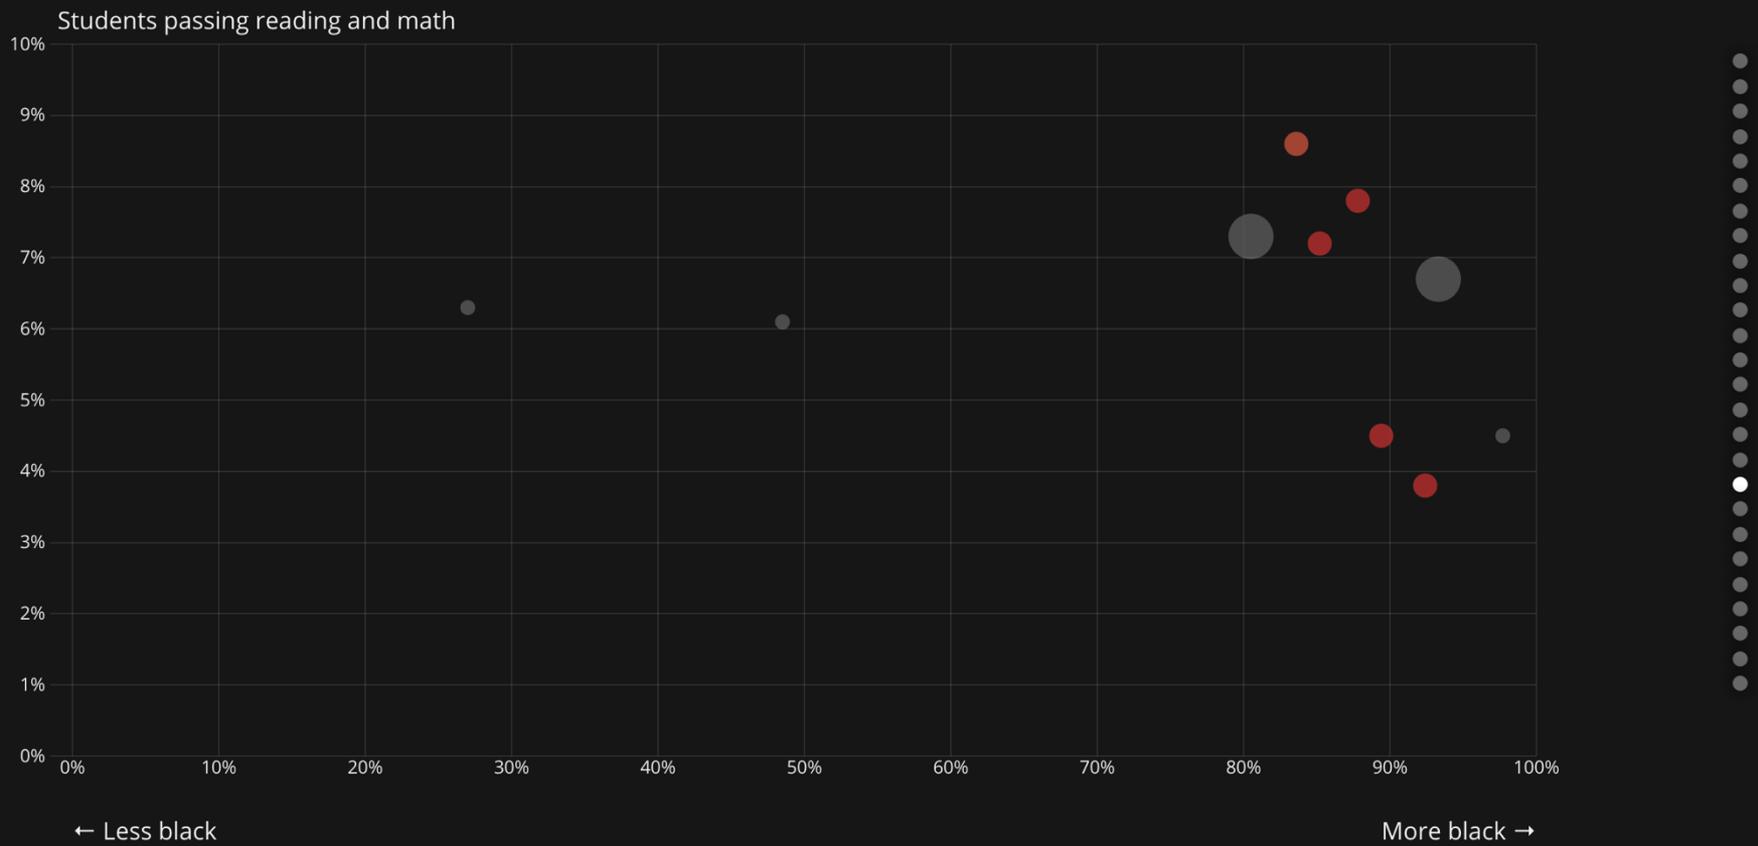

They score worse than almost any school in the **state**.

# Ten Florida elementary schools have similar failure rates.

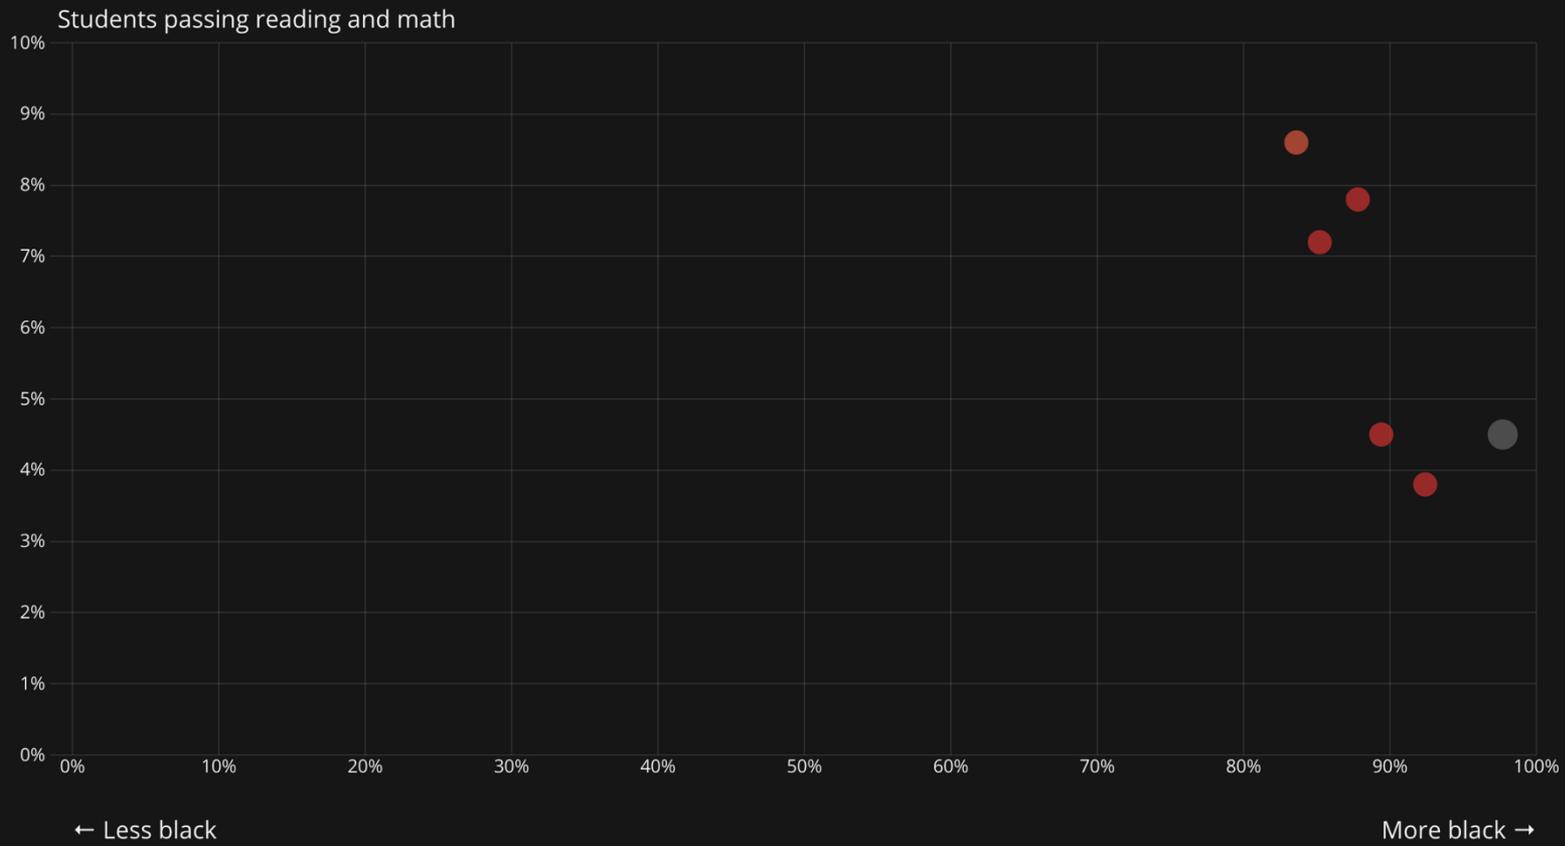

Take away privately run charter schools,  
and there are **eight**.

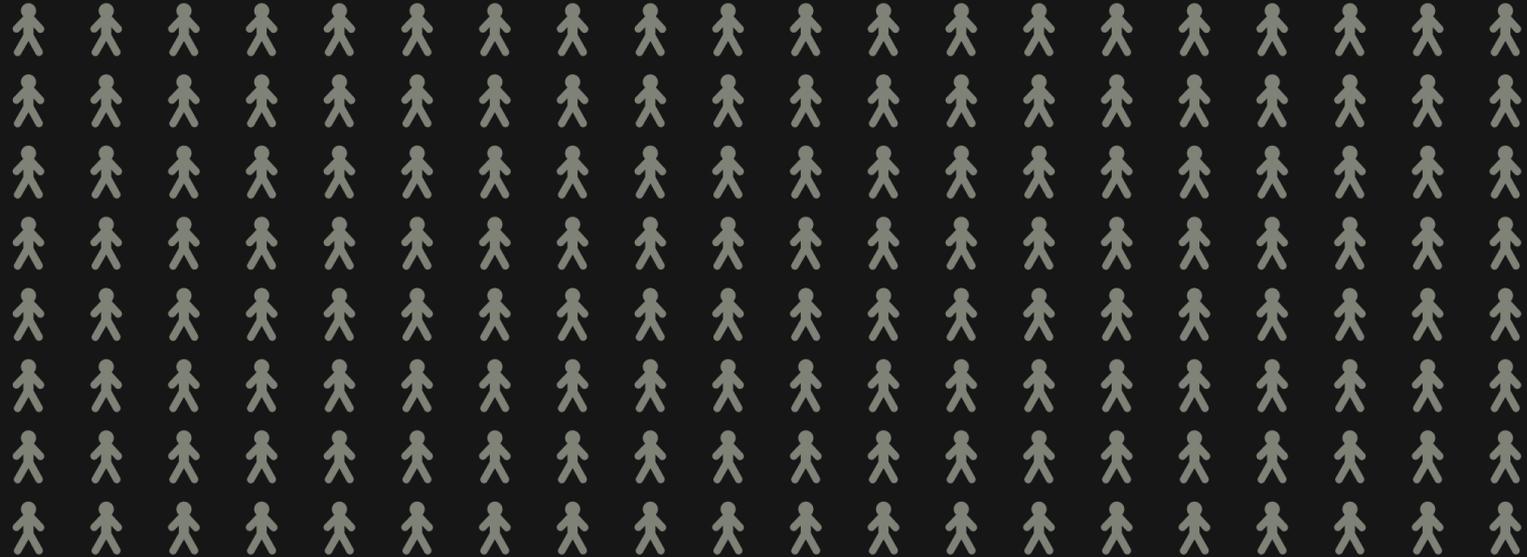

Take away a nontraditional early learning center, and **look what's left.**

Melrose is the **worst-performing** school in Florida. In 2014, **160 children** there took state exams.

154 failed reading or math.

Only **six** passed both.
