2, Clause 9 (on Budgetary transparency) and Clause 10 (Transparency of public procurement of goods, works and services) were removed to be in line with the newly approved The Glass (Transparent) Account Law. The Law regulates mechanisms to provide information to citizens about the policies and activities of the Ministry of Justice and Interior, prompt connection with the staff responsible, approval of time, subject, and schedule according to the contracts with press broadcasters for making public announcement, publicly inform any activity and/or event of the Ministry, and to promote Ministry's reform processes developed within legal framework to be submitted to the Parliament and draft legislation in a specific program. In order to ensure transparent information, the Government agencies have regularly updated their web pages and linked to social networks. The Information major transparency strategies of Ministry's agencies and organizations are developed and approved. In order to implement these, the Ministry of Interior has developed the Justice and Communication Strategy on Media and Public Relations. End date 2016 Next steps

| Completion level | | | | Х |

- In 2014, the Government (Cabinet) Resolution # 384 approved the "Glass Account Procedures on the Standard of Information Content to be on accessible online".
- In order to provide information on the Law on Glass Account and its enabling procedures, a total of 15000 civil servants at all levels were trained through 112 workshop seminars.
- 25000 copies of printed standard guideline on "Law on Glass Account, and procedures of data entrance on the glass account website" disseminated among the public sector institutions.
- Within 10 days of each month, all information on the government budget performance to be posted at the http://www.mof.gov.mn (Ministry of Finance)
- Citizens complaints are decreased after placing the public procurement tender materials of bidding companies online at public websites.
- In order to consolidate all information regarding public tenders, investment, procurement of services, producers and budget forecasts are placed on https://tender.gov.mn. In 2016, the website has 2965 tender invitations in total, however only 567 tender results have been registered therefore, client organizations underperformed on providing information regarding tender results to citizens. Therefore, the client public sector institutions have been contacted to follow the policies on timely posting of full versions of public procurement contracts on the above website

| | | | | Х | |

Within the framework "Governance Support Project" of the World Bank, The Computerized Mining Cadaster System (CMCS) has implemented in partnership with the Mineral Resources Authority. The project has improved administrative procedures and public services. The central database of mining and exploration licenses at https://cmcs.mram.gov.mn/CMCS/, which is accessible to citizens. By end of 2016, it has registered 2174 exploration licenses and 1571 mining and tenure licenses.

It provides comprehensive information regarding license owners, duration of license, commencement and termination date of license, location are, name and ID code transparently to citizens. Users can easily find out any license through various filters.

This database provides information access on special areas such as special state area, small scale mining area, strategic deposit are etc. All licenses and special areas are also available on the e-mapping section of the database.

Second project has implemented within the scope of Extractive Industries Transparency Initiative (EITI) and under EBRD financing the EITI electronic reporting system has developed at http://tailan.eitimongolia.mn/.

License data from cadaster of MRAM is downloaded to this system and data required by EITI standard is disclosed. That is covering the number of license, name of field, sixe of field, type of mineral, name of holding company, issued and expiry dates.

License data is delivered to citizens in accessible mode on e-mapping, which allows to filter as per aimag (province), soum (county), number, name of field, size of field, type of mineral in open data format, is available to be downloaded as table.

On top, the system receives electronic EITI report from business entities operating in extractive sector, which discloses all paid taxes, payment, fees, donation by entities to central and local budget, also discloses annual production, sale proceeds of extractive products, rehabilitated land from environmental damage.

Descriptions of the results

| Complet | ion level | Not started | Limited | Substantial | Completed |
| | | | | | X |

In order to ensure the contract transparency, the Mongolia EITI National Council established three technical sub-group in 2015, which was chaired by the Director of Mining policy department of the Ministry of Mining and Heavy Industries.

This group conducted a rese on legislation related to contract disclosure, organized meetings with contracting parties and downloaded contracts and created database.

The group is now working to finalize adaption of the Contract Transparency web site. This online database is accessible at www.iltodgeree.mn and will contain and disclose public all Investment agreements, Production sharing agreements, Local cooperation agreements, Agreements on use of water and land.

The contracts in the database are in metadata, PDF version of contracts, converted PDF text, and explanation annotation of relevant clauses and articles. Users are able to search, compare and download documents from database.

In accordance with the Law on Minerals, and the investment (and taxation) stability and mining agreements are to be made public. Thus, agreements with Boroo Gold LLC on Boroo gold mine, "Tsairt Mineral" LLC on "Tumurt Ovoo" zinc mine, Chinhua-Mak-Nariin suhait LLC on "Nariin suhait" coal mine and the Investment agreement with the Oyu tolgoi LLC on "Oyu tolgoi" mine are now public.

The following amendment was made to Article 11 of the Law on Minerals: The government office shall organize issuing of, revocation, transfer and depositing of exploration and mining licenses and return or transfer activities of mine site under public scrutiny. License holders shall make an agreement with local government offices in regard to protecting environment, mining and industrial infrastructure development and increasing workplaces. The Government (Cabinet) meeting approved standard template for this agreement by its Resolution # 179 of 2016.

Also, the sub-working group of Mongolia EITI National Council on Contract Transparency has created database of contracts made with local authorities. The database collected contract information from 15 regional governments and capital city, including

information of 59 contracts, of which 25 are copies of contracts.

Following the revised Law on Petroleum, the principles production sharing agreement implemented. The Government (Cabinet) approved standard template of production sharing agreement by its Resolution # 104 in 2015 and published on www.legalinfo.mn accessible to citizens. A list of companies that have production sharing agreement is placed on websites of the Ministry of Mining and Heave Industries, the Mineral Resources and Petroleum Authority (MRPA). Additionally, the Government (Cabinet) approved standard template for agreements on environmental protection and voluntary support to local development by its resolution 430 of 2015. Currently, there are 25 production sharing agreements have been made. The sub working group of Mongolia EITI National Council on Contract Transparency meeting with companies which have organized concluded Production sharing agreement and agreed to disclose the whole agreement except Annex 'B', which is about geology and exploration finings.

The MRPA organizes information provision activities every year in the aimags /provinces these agreements relate to. An advantage of the revision of Petroleum law in relation to investment decision making is that it sets different timing for each organization. Also, it reduced the processes for making production sharing agreement.

| Brief Description of Commitment (140 character limit) | | Developing public servise portal for people to recieve e- services regardless of the location and distances and operating public service portal and 20-30 public services are included in that portal. |

Relevance

Briefly describe the way in which this commitment is relevant to further advancing OGP values of access to information, public accountability, civic participation, and technology and innovation for openness and accountability In a project framework of Public Procurement Office 2013-12-03-02 "Developing modules for general public service portal", this four organizations: License Center of General Police Department, Ministry of Roads and Transportation, General Insurance Department and General Social and Welfare Service Department to switch 25 public services into e-services. According to the planned activities, the following works were done: collecting service requirements, creating an environment for testing, programming and simulation of these organizations.

In order to increase the types of public e-services, we conducted public service survey among 60 organizations on possibility of adding and connecting to the One-stop shops and www.ezasag.mn. As a result, we determined about 167 services that can use the e-services. In a framework of this activity, "Introducing e-Public services" of Government (Cabinet) Resolution of 2015, the list of public services that can be connected to the public e-services were approved and this work could be done through the partnership of public and private organizations.

Ambition

Briefly describe the intended policy results of the commitment and how it will either make government more open or improve government through more openness.

Positively influencing government actions for introducing new methods to introducing e-services, providing public services promptly against with the OGP values of technology and innovation advancement.

Justice State Secretary's decree No. A/53 formed a working group to develop "E-Mapping of Crime Occurence System Application to the Police Activities" project. The project has fully completed and an crimes e-mapping system is operational at http://www.crimemap.police.gov.mn/. Total number of 72,577 registered crimes in nine districts of Ulaanbaatar have been inserted by the Information and Technology Center of the General Police Department. The data covers certain registered crimes of 2011 and 2012, and all registered crimes from 2013 to present. IT department updates the databes dalily bases.

The crimemap web site has 3 sections which are crime map, diagrams, and list of crimes. All three sections can be filtered by crime category, place that is occured, and a time period. Users can use 11 categories of crimes, 9 distcrists and khoroos, as well as any time period up to 6 moths or a year to filter in different sections.

Each pinned crime in the map shows crime's category, number, occured time and place including police department it got registered.

Diagrams show more analytical information such as case detection rate, type of place that crimes occured, as well as occured time and a day of a week

In the third section, similar information can be seen in a list which allows users to check details in more organised form.
