

HONDURAS

OPEN GOVERNMENT PARTNERSHIP

Open Government is a Government of all and for all

IV ACTION PLAN FOR OPEN STATE HONDURAS 2018-2020

MESSAGE FROM THE PRESIDENT

Dear Honduran People:

It is very satisfying to present and put at your disposal the Fourth Action Plan of Open State Honduras 2018-2020, in which we had a broad participation and effort of different sectors: civil society, private enterprise, academy and government, through a participatory and inclusive process. With this new Plan of Action we are moving forward in the construction of a more modern and efficient government, with the consolidation of an Open State, guaranteeing transparency in its management, accountability and citizen participation in the combat against corruption.

Within the framework of our commitment to promote transparency and fight against corruption, a Fourth Action Plan has been formulated, which is the result of a methodology which was thought and designed with the citizens (From Below Upwards), that encourages citizens participation through official consultations that were developed digitally and face-to-face at a national level, carried out in order that each region of the country will expose their needs and in that sense prioritize them in accordance with the principles and values of the Open State Partnership.

It is noteworthy that this process of consultation with citizens included face-to-face meetings in 9 representative cities of the region which guaranteed accessibility and participation of those citizens representatives of the different sectors of the country, these meetings generated a total of 50 large priority necessities and 200 specific actions to consider for the construction of the Fourth Action Plan in mention. These face-to-face dialogue with the citizenship generated relevant issues to consider like: ; Control of Corruption, transparency and access to public information, citizen participation and accountability, modernization, digital government and Good governance, integrity, electoral, legislative and judicial transparency, health, education, safety and culture, employment generation, competitiveness, human rights development, reduction of inequalities and social protection, budget, mitigation and adaptation to climate change, gender, human rights and innovation.

This action plan establishes a transcendental tool for combating corruption and promote greater transparency in the culture of the Hondurans. In this sense is important to recognize that historically in our country it has not been easy to open spaces for citizen participation, much less to influence the use of public resources and the generation of new management models. That's why an Open State, engages and involves citizens and other social performers in a joint effort to solve public problems, taking advantage of the

potential of each of them, highlighting the effort of each and every one of the members that represents any sector of our country.

As a result, to date we have launched three Open State Action Plans in Honduras, which represent an opportunity to strengthen the link with the citizens and their demands, in order to guarantee a quality of service in the public services, increased integrity in the public sector, efficient and effective management of public resources and the opportunity to create safer communities, as well as to increase corporate responsibility. Honduras has managed to position itself at the international level for the good practices that it has performed in relation to the Open Government Action, both in its formulation as in the involvement and openness to spaces for citizen participation.

Open State is about stop governing its citizens and start to govern with them and for them, creating an atmosphere that allows a transforming change, with an Honduras more transparent every day. Under the above, May 16 2018, marked a historic date for the Hondurans, the three Powers of the State, the controlling bodies of the State, the Access to Public Information Institute and the Association of Honduras Municipalities as a whole, ratified their commitment in the fight against impunity to build trust in public institutions, all in order to ensure the correct and honorable functioning of the public sector and the adequate use of resources, and to transform Honduras from a Open Government to an OPEN STATE.

In that sense, Honduras today has a National Transparency Policy that is based on the international conventions against corruption subscribed by Honduras and the principles set forth in the Declaration of Lima, adopted in the VIII Summit of the Americas "Democratic Governance Against Corruption". The policy adds substantially to the process of consolidating an Open State, it is built around seven principles that seek to ensure the feasibility, effectiveness and materialization of its transforming spirit, as well as the compliance with its strategic axes, to avoid the repetition of failed experiences, the duplication of efforts and generating expectations that are not possible to fulfill.

Many thanks to the friends of the international cooperation, civil society, academy and private enterprise, for having your firm commitment. Each of you as overseers of this action plan, know all the valuable support and involvement you have manifested in the co-creation of this Action Plan, which adds to the efforts of the country to improve its actions for a more transparent state. Thanks to all the support and the institutions that contributed to it, I will like to motivate and encourage everyone to continue to work in a coordinated way, to participate actively in this initiative, for more transparent government actions to be carried out and for the acquired commitments to be continued and together let's assume the responsibility of the challenge that under the terms already established will be accomplished effectively. Urging all of them to work harmoniously to consolidate an Open State for the best interests of Honduras.

Abg. Juan Orlando Hernández
President of the Republic of Honduras

TABLE OF CONTENTS

Acronyms	4
Background	5
1. Introduction	6
Briefly explains the national and municipal context, it describes why the government efforts in pursuing an Open Government in the country are important. In addition, this section describes which are the priorities of governance reforms for the country and identifies the social, political or economic problems more important for the country which will be addressed through this National Action Plan OGP, along with a justification.

ANTECEDENTS

OPEN GOVERNMENT PARTNERSHIP INTERINSTITUTIONAL COUNCIL.-On February 14 an informative space was established where the Open Government Partnership actions and the results obtained in the implementation of the III Open Government Honduras Action Plan 2016-2018 were announced, also the Inter-institutional Council of AGAH was officially installed as a permanent instance of dialogue between Government, Civil Society, Private Enterprise and Academy, with a 2018-2020 period, conducting the process of the election of the Technical Follow-up Committee (CTS-AGAH), which functions as an executive branch of the Interinstitutional Council.

The different sectors met, initiating a stage of transparent, democratic and inclusive deliberation and according to the methodology contained in the operation standards of the same, it resulted in the appointment of the following institutions that will come to represent them within the Technical Monitoring Committee, period 2018-2020: from the Government Sector: Institute of Access to Public Information (IAIP); Attorney General's Office (PGR); from Civil Society: Social Forum on External Debt and Development of Honduras (FOSDEH); National Forum of Convergence (FONAC) and Permanent Forum of Organizations of Civil Society (FPOSC); from the Academy: José Cecilio del Valle University (UJCV); National Autonomous University of Honduras (UNAH); National Forest Sciences University (UNACIFOR); and from the Private Enterprise : Honduran Council of Private Enterprise (COHEP), Chamber of Commerce and Industry of Tegucigalpa (CCIT) and the Federation of Chambers of Commerce and Industries of Honduras (FEDECAMARA). Also, because this year the position of coordinator corresponds to the Private Enterprise, as indicated by the "Operating Rules of the Inter-institutional Council AGAH ", as a result, the Honduran Council of the Private Enterprise (COHEP) was appointed, which will remain in office for a term of twelve (12) months.

Members of the Technical Monitoring Committee AGAH (CTS-AGAH), who reiterated their intention to join efforts in favor of strengthening transparency in management of the public administration.

PERIODO 2018-2020

1. INTRODUCTION

In August 2011, the Government of the Republic of Honduras adheres to the Open State Partnership Initiative (AGA), with the signing of the Letter of Intentions, with the objective of promoting transparency, accountability, a culture of ethics and citizen participation in the country, in agreement with the values of the AGA. For the Government of Honduras it is essential to strengthen a culture that responds to the aforementioned objective, so it requires fulfillment in continuing the promotion of the commitments established in the Open State Action Plan (PAGA).

In this sense, the government of Honduras has decided to include into this action plan commitments in accordance to the five challenges established by the AGA, which are focused on: i) Increasing public integrity; ii) Efficiently and effectively managing public resources; iii) Improving the public services; iv) Creating safer communities and v) Increasing the responsibility of corporations. The above-mentioned, in order to consolidate significant advances which will increase the citizens confidence in this type of initiatives.

Honduras, reaffirming its commitment in the fight against impunity in acts of corruption, and its high commitment to the values of the AGAH initiative, as well as promoting transparency, citizen participation and building trust in the public institutions, in the month of May in a public act the presidents of the Powers of the State, holders of the Control Organs; the Attorney General of the Republic, the Attorney General's Office, the Superior Court of Accounts, likewise, the Institute of Access to Public

Information and the Association of Municipalities of Honduras, met with the objective of subscribing the **Declaration to Consolidate Honduras as an Open State**, transparent, agile, responsible, efficient that continues promoting the development of Honduras. The declaration seeks a more harmonic collaboration between all the entities of the State, with the support of the civil society, private enterprise and academy, in the greatest commitment for a frontal, total and radical fight against corruption, impunity and abuse of the public entities in all of its forms.

This statement is consistent with the Lima Agreement "Democratic Governance", recently subscribed at the Summit of the Americas, as well as with the 2030 Agenda for the Sustainable Development of the United Nations in which the principle 16 tends to a new framework of public governance. Honduras is an adopter of both of these instruments. In addition to the above, for the development of the action plans, Honduras considers the standards of Participation and Co-creation of OGP, which establish the requirements that should be followed as to the collaboration with the civil society, citizens and other actors throughout the process, by all means we can highlight:

- The commitment with the citizenship to guarantee access to information regarding the development of the action plan, to offer the civil society and other actors relevant information on all the aspects of the national process of open government in the country, including all the contributions made by the different social sectors, there is a national digital repository of this

process <http://www.gobiernoabierto honduras.org>, in order to ensure the propagation of the information. Additionally with the co-creation process of this plan, the citizens are informed of the advances which are fulfilling the commitments. For that purpose Honduras has the System of Monitoring and Follow-up of the Honduras Open State Partnership (SIMAGAH), which consists of useful tools and methods where every person has free access to obtain the information regarding the current status of progress from each of the goals that are derived from the commitments reflected in the current action plan.

- Installment of spaces, or instance of dialogue to guide and guarantee the effective process of co-creation of the IV Action Plan, in this sense, in an official manner, the Inter-institutional Council AGAH is established as a permanent instance of dialogue between the Government, Civil Society, Private Enterprise and Academy, for a period of two years 2018-2020, to make way for the process of election of the Technical Follow-up (CTS-AGAH), that will work as an executive branch of the same, allowing and facilitating a permanent and inclusive dialogue that fits the current national context.

- Joint work, between the Government and key actors of the

society, with important levels of participation; the government of Honduras and the actors that support this initiative, perform with a lot of responsibility and effort the following actions;

- I. **Inform**, the government through permanent communications to all the citizens in general, and in the specific case of Honduras to the different sectors of civil society, academy and private enterprise;
- II. **Consult**: where the government does not only informs the different sectors, but it also encourages dialogues, open to suggestions and recommendations that can become concrete actions in the decision process;
- III. **Involve**: the government works with all social sectors (highlighting civil society involvement) to ensure that their participation is active in the final decisions of these processes;
- IV. **Collaborate**: the government works in coordination with the key actors to achieve joint determined actions, creating synergies between the parties involved, and,
- V. **Empowers**: the government and sectors of society identify effective solutions for the problem addressed in this instance.

2. OPEN STATE ACTIONS TO DATE

Honduras established 20 commitments in its First Action Plan, 14 commitments in its Second Action Plan of Open State 2014-2016, which were oriented to three of the great challenges of the OGP: i) Increase in Public Integrity, ii) Effective and efficient management of public resources and iii) Improvement of public services. The advances have been substantial, on June 30, 2016, it was presented the evidence that 26 milestones have been completed, 12 with a substantial advance and the rest of them in the process of completion, which have strengthened the actions of the Government of Honduras in transparency, accountability and citizen participation. 4 commitments were fully completed, these being: 2: respect for the citizen's right to obtain information from public archives; 3: ethics in the public service by the Code of Regulation of the Ethical Conduct of Public Servants and the complaints mechanism; 6: citizen empowerment on the budget; and 10: Knowing the EITI and its results.

In the III PAGAH 2016-2018, Honduras established 13 commitments, of which 9 are new and 4 are ongoing commitments. The commitments are catalogued according to the next themes: Control of Corruption, Access to information, Public Expenditure, Purchases, Natural Resources and Environment, Public Services and Digital Government. The commitments respond to the challenges of: i) Increasing the public integrity; ii) Efficient management of public resources, iii) Improvement of public services; and iv) Creating safer communities.

In relation to the progress of the III Action Plan, in the Government Self-Assessment Report of Middle Term - III PAGAH 2016-2018 "(Spanish and English version), it was reported the III Action Plan had as a middle term result of 20% of the goals met, 47% with substantial progress, 13% with limited progress and 20% without initiating.

To date, the advances are valuable and truly substantial and are summarized in the following way; Accomplished; Implemented a participative Municipal Transparency Index and disclosing it annually; Establishment of 5 alliances with authorities that allow high-risk communities to develop their conversion to resilient communities; Developing of a website for the generation of proposals aimed at tackling the problem of weather; To approve by means of an Executive Order the Integral Policy of Transparency, Probity and Ethics of Honduras (PITPEH); Publish semi-annual reports on "Who buys what?" (State purchases) with friendly presentation to citizens; Substantial; Mechanism of consultation of statistical, budgetary information and indicators of educational quality within the framework of the Educational Center Administration System (SACE); Platform technology that allows citizens to: a) Monitor the purchase, b) Monitor the National Program of Pharmaceutical Assistance, c) A space to present complaints and accusations; Creation of the Citizen Innovation Laboratory for Honduras (LabiCHN); Creation of a Page in social networks and an App that works off-line to present information about threats, risks and potential losses associated with the occurrence of disasters, with the indication of who is exposed and who is vulnerable, in communities where there are extractive industries established, replicate the governance mechanism of the EITI at the local level to ensure that vulnerabilities in

these areas are addressed in a special way in the National Plan of Climate Change, among other important actions developed in this plan.

See <http://presidencia.scgg.gob.hn/SGPR.Admin2017/GobiernoAbierto>

In general, it can be summarized that, the experiences obtained in the III Action Plan of Open Government in Honduras, the efforts evidenced by the institutions involved are increasingly significant and closely linked to the promotion and compliance with the principles and challenges that govern the OGP, and that they seek to address the solution to the specific needs of the citizens and the problems of priority in Honduras.

Within the framework of III PAGAH, the AGAH Inter-Institutional Council was formed, composed of the Government, civil society and private enterprise and academy, corresponding to the 2016-2018 period and its operational branch, the Technical Follow-up Committee of the same. The Academy sector was incorporated into the Open Government Alliance in Honduras and the Academic Committee of the AGAH was constituted with the participation of 12 public and private universities. Likewise, the Youth Open Government Council was formed, as a participation channel for Honduran youth to contribute to the country's efforts in terms of transparency, accountability and citizen participation, with the participation of young representatives of the universities around the country.

The Open Government Virtual Diplomat in charge of the SCGG-UNITEC was developed, with the purpose of empowering the key actors in this process: government, civil society and youth councils, certifying 50 people on issues of open government. Developed I and II Open Government Fair, in which accounts were rendered to citizens through the participation of institutions responsible for commitments, civil society and international EITI initiatives HN and CoST. Finally, the Implementation of the Open State Honduras Monitoring and Tracking System SIMAGAH, linked to the Results Management System, with a citizen reporting module in which any citizens can visualize the progress and fulfillment of the commitments of the open government action plan.

Finally, it is important to point out that on May 16 of this year, the **"Declaration to consolidate Honduras as an Open State"** was signed, reaffirming the commitment in the fight against impunity in acts of corruption, as well as promoting transparency, citizen participation and building the trust in public institutions, the document is signed by the three branches of the State, controlling bodies, IAIP and AHMON. Likewise, on July 31, the **Integral Transparency and Anticorruption Table** was installed, which is responsible for monitoring the implementation of the National Transparency Policy, Integrity and Prevention of Corruption, promoting improvements to it and coordinating inter-institutional efforts to achieve full compliance with its strategic axes. This commitment of the III PAGAH, is today a fully operational priority of the government of Honduras in its fight against corruption.

In this new action plan 2018-2020, is also taken in consideration the recommendations issued by the Independent Review Mechanism (MRI) in its review report of the III Action Plan of Open State Honduras 2016-2018 and follow the SMART principles, that are

congruent with the results of citizen consultations that prioritize the issues of corruption control and administration of public resources and retakes some of the commitments with moderate or transformative impact to conclude them or advance in this new plan. Among them, thematic of civil service, implementation of the national policy on transparency and its strategy and the implementation of the laboratory for citizen innovation in the country.

The most relevant issues and with the greatest demand by citizens to be considered as priority in this IV Action Plan of Open State Honduras 2018-2020 are; transparency and access to public information; citizen participation and accountability; modernization, digital government and good government; integrity; electoral, legislative and judicial transparency; health, education, safety and culture; employment generation competitiveness; human development, reduction of inequalities and social protection; budget; adaptation and mitigation to climate change; gender; human rights and innovation.

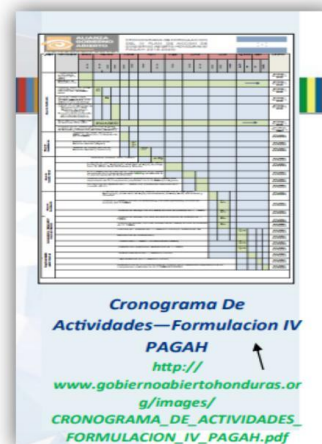

3. NATIONAL ACTION PLAN DEVELOPMENT PROCESS

Honduras has designed the co-creation process of the IV Action Plan of Open State Honduras 2018-2020, structured on the bases and methodological guidelines of the AGA, following a broad, inclusive, participative and complete process of public consultation, which responds to the full knowledge of the citizenship about the activities programmed for the co-creation of the open state action plan of Honduras as scheduled, also the creation of the mechanisms to provide the citizen, all the relevant information about the process of co-creation, in order to generate easily accessible and interactive tools that will let them know and participate in this process.

1. AVAILABILITY OF THE SCHEDULE

The Follow-up Technical Committee (CTS-AGAH) 2016-2018) with the support and coordination of the Technical Secretariat, developed a program defining the critical path of actions to perform for the co-creation of the IV Action Plan in mention with the sectors of: Government, Civil Society, Private Enterprise and Academy. In that sense the Council was formed in an Inter-institutionally, with the aim of creating a permanent instance of dialogue between the referred sectors for the period 2018-2020.

Also, in accordance with the Follow-up Technical Committee of the AGAH (CTS / AGAH) 2018-2020: the conformation of CTS / AGAH was derived from the inter-institutional council, taking into account all of the participants, who were elected through an inclusive process by the means of voting. This committee constitutes the operational branch of the Inter-institutional Council and has the purpose of guiding the process of co-creation, implementation, monitoring and follow-up of the IV Action Plan of Open State of Honduras 2018-2020.

The schedule of the consultation process was publicly presented on January 2018 by the CTS-AGAH, in the presence of representatives of the public sector, private enterprise, academy, civil society and international cooperation that attended the event of establishment of the Inter-institutional Council and Technical Committee of the AGA Honduras (AGAH 2018- 2020). It was also placed on the official website www.gobiernoabierto honduras.org

2. ADVANCE NOTIFICATION

The Co-creation process began 6 months in advance, with each stage entirely planned, in order to guarantee the widest participation and consultation across the country. Invitations and calls to the awareness conference were sent at least 2 weeks in advance by the Technical Secretariat of the AGAH. In the month of May, the Official Consultation Stage was developed (**Digital and Face-to-face with the citizens**), which had an extensive invitation in the same way with more than 8 days in advance. In addition, 300 digital consultations were received, which guaranteed greater openness for citizens to participate in this process.

Within the framework of the co-creation of the IV Plan of Action, according to the planning and with the object of collecting as many inputs as possible through the different sectors in the national level, it was possible to visit nine strategic cities of the country, and their surrounding regions; Tegucigalpa, Danlí, Juticalpa/Catacamas, Choluteca, San Lorenzo Valle, Comayagua, Santa Rosa de Copán, San Pedro Sula and La Ceiba, with the objective of co-creating the IV Action Plan and based on the necessities prioritize by those citizens, valuable proposals were obtained that are considered potential commitments in this new Action Plan, the above in consideration of the current national political context and the pressing needs of the citizens.

3. PUBLIC AWARENESS

The awareness-raising stage was extensively developed using digital means. During the month of March until April, more than 10 days of awareness raising were achieved in which people from all the different sectors participated, and it was considered as a valuable input for the co-creation process of IV Action Plan of Open State of Honduras 2018-2020. It was given valuable seminars at public and private universities of the country, achieving even greater participation of the Honduran youth in this co-creation process. In this seminars information about the background, relevance, principles, challenges and results of the Open State Partnership in Honduras was shared.

The awareness stage was held during the month of March, with an important awareness-raising strategy through social networks, in order to inform the citizenship on the international initiative Open State Partnership Honduras, its framework of action and the importance of citizen participation.

4. MIXED CHANNELS

The consultation process included face-to-face dialogue meetings in 9 of the 18 departments of the country to guarantee the accessibility and participation of representatives of the public sector, private enterprise, academy, civil society and college students in the process.

The stage of digital consultation was performed during the month of April to May 31, as an input for the process of co-creation of the IV Action Plan of Open State Honduras 2018-2020.

Link: <http://www.gobiernoabierto honduras.org/index.php/formulacion-cuartopagah/consulta-oficial-digital>

This face-to-face consultation stage was held during the dates 21 -31 May. In the stage of consultation it is expected that through an inclusive, highly participative and open process, with the objective of identifying the needs of the population in their communities framed within the strategic challenges of OGP. In this sense, it is important to identify the necessities of the communities, which through a systematization they will be transferred in potential commitments in the IV Action Plan of Open State of Honduras 2018-2020.

It is important to mention, the use of social networks, such as Facebook <https://web.facebook.com/Alianza-Gobierno-Abierto-Honduras-AGAH> and Twitter @AGA_Honduras which allows a more direct interaction and participation of the citizens, accessing immediate comments, about the actions and activities carried out in the process.

Another of the opening mechanisms in this process, which is available for the citizen is the official email, comite@gobiernoabierto honduras.org which functions as the official link of the Open State Partnership Honduras, the email is administered and is under the responsibility of the CTS-AGAH through its Technical Secretary. Added to this, at the different events where appearances were made with activities related to the co-creation of PAGAH, it was given to the participants, different press bulletins, informative materials that are allusive to this co-creation plan process.

4. EXTENSION OF THE CONSULTATION

Between March 28 and April 04, the citizens contributed with ideas and comments through the digital queries on the Open State Honduras official websites; 10 days of consultation in which the people from the same cities where the meetings of awareness were held participated. In this

queries the needs of the communities were identified through a consultation template that facilitated the dialogue between those who attended, which led to more than 1500 proposals through all the nation, all in order to transfer them in priority commitments in the Action Plan of Open State of Honduras 2018- 2020.
<http://www.gobiernoabierto honduras.org/index.php/formulacion-cuarto-pagah/consultaoficial-digital>

Subsequently, between July 30 and August 13, 9 intense days of socialization of the IV Action Plan draft were held throughout the country to obtain citizen feedback in preparation of the final version.

5. DOCUMENTATION AND FEEDBACK

All the information of the co-creation process and especially of the consultation was organized and made available to all actors in this process, the documentation is available online, at the following link:
www.gobiernoabierto honduras.org/index.php/formulacion-iii-pagah-2016-2018/etapa-deconsulta

6. DIALOGUES DURING THE IMPLEMENTATION

The forum that will allow periodic consultations with all of the actors during the implementation of the action plan will be the Inter-institutional Council of the AGAH and its operative technical instance the CTS_AGAH.

4. COMMITMENTS

The consultation process determined the route of the commitments to be considered as Priorities in the IV Action Plan of Open State Honduras 2018-2020, which respond to the challenges of the OGP Initiative of: i) Increasing public integrity; ii) Efficient management of public resources, iii) Improvement of public services; iv) Creating safer communities and, v) Increase in corporate responsibility. In that means, we have highlighted the priority issues identified by the citizens;

- i) ***Increase in public integrity***; Increasing the access to public information in all fronts of public administration; Publishing Open Data of interest to the public so they can be used by citizens; Increase the transparency in economic and fiscal affairs; Strengthen the institutional framework to guarantee complete compliance with the mandates of the Transparency and Access to Public Information Law (LTAIP); Train public servants and citizens in the knowledge of their rights and duties under the LTAIP; Increase transparency, accountability and the interaction channels of and with the National Congress, Judicial Power, Prosecutor's Office, IAIP and the TSC;
- ii) ***Efficient management of public resources***; Tend to increase the citizen participation in the budget cycle; Strengthen the State system of public procurement to give guarantees of transparency, efficiency and integrity; Strengthen the monitoring and auditing system on public construction contracts; Improve the regulatory framework and corporate governance of public institutions and of their trusts;
- iii) ***Improvement of public services***; Strategies aimed at creating incentives and tools for good government; Promoting a policy of streamlining procedures; Stimulate the actions necessary to move towards a digital government; Improve the regulatory framework and management capacity of the State's human resources; Run a program to strengthen transparency in the education system; Creating educational public policies capable of guaranteeing the formation of citizenship;
- iv) ***Creating safer communities***; Promotion of sustainable and resilient practices to ensure basic livelihoods in the communities; Run a program of solid and liquid waste management; Development of educational strategies for community training in solid waste management;
- v) ***Increase in corporate responsibility***; Develop employment generation programs for vulnerable population and under unequal conditions; Promote the due diligence of human rights within responsible business management.

It is important to highlight that the commitments: System of unified procedures and the City's Laboratory of innovation and Development of resilient communities with citizen participation and technological innovation, contained in the III PAGAH 2016-2018 are retaken in the present Action Plan, the other topics contained in the III PAGAH maintains continuity in this one as new commitments. Likewise, commitments are included of the following instances that previously had not participated in any PAGAH: Judicial Branch,

National Congress, Supreme Electoral Court, Superior Accounts Court and the Honduran Private Enterprise Council

COMMITMENT ACCORDING TO THE OGP STRATEGIC CHALLENGES

COMMITMENT TEMPLATES

Commitment Template	
1. ACCOUNTABILITY PORTALS GUARANTEEING GREATER ACCESS TO PUBLIC INFORMATION	
Starting date and end of the commitment (SEPTEMBER 1, 2018- August 31, 2020)	
Institution or actor responsible for the implementation	Institute of Access to Public Information
Description of the commitment	
What is the problem that the commitment addresses?	Legal regulations still exist that hinder in some way the effective application of the right of access to public information, limited opening of information on issues of trusts, CSOs and public resource management and the little availability of the legislation enforced in the country, in a single center of information. Likewise reducing the cases of denial of application without justified cause, and to achieve greater involvement of children and adolescents in issues of transparency and access to public information.
¿Which is the commitment?	Opening of interactive portals to promote transparency and accountability to guarantee the citizen access to information on the topics referring to trusts held in the country with public funds, CSOs and management of public resources, as well as the current legislation organized and in open data format. Citizen empowerment of children and youth, with at least 100 teachers trained in the LTAIP and their right to access information as a human right.
¿How will it contribute to solve the problem?	Provide the citizens with the technical and legal mechanisms, as well as the instances necessary to facilitate access to information, contributes in a substantial manner to the Government assuring its obligation to inform, render accounts and make public information available to its citizens of all its management. Sectors of empowered citizenship of the processes and rights that grants the transparency and access to information law to obtain the information they require from the state. Alert mechanism for competent institutions to improve the response processes to requests for information of the citizenship.
¿Why is it relevant to the values of the OGP?	Transparency; these commitments will help to comply with the law of access to public information based on international standards, of which Honduras is a subscriber and achieve greater transparency in the public management, bringing it more closer to the public, who has the opportunity to influence or make decisions. Citizen participation; One of the benefits of access to information is the citizen participation, because knowing and analyzing the information that will be loaded in these portals, will allow to evaluate the performance of the government through the accountability that each authority must present of the public resources that they receive and use. Accountability; the surrender of accounts by the institutions, generates greater opening to information and in the end greater involvement of the citizens demanding answers, proposing and achieving better benefits for their communities. Technological innovation; designs of digital platforms that facilitate loading, and timely and effective information management by institutions to favor the citizenship.
Additional Information	<ul style="list-style-type: none"> For the process of reforming the classification law, for its approval by legal competence the Sovereign National Congress intervenes. Development of practical mechanisms to generate alerts when there is no response to requests for information. Statistical information administered by the IAIP.

		<ul style="list-style-type: none">Subscription of agreements with the Secretary of Education and the academy to achieve the greatest number of teachers, to train our children and youth.Strategic alliances with key government institutions and CSOs for the creation of information portals and surrender of accounts.	
Activities and deliverable product		Starting date:	Ending date:
1. Strengthen the platform http://sielho.iaip.gob.hn in order to monitor, compile and statistical process data on requests for information that were rejected by public institutions.		September 1, 2018	August 31, 2019
2. Train a group of Transparency Teachers, in charge of the dissemination of the Transparency Law, in development of the cooperation convention of the IAIP and the Education Secretariat that subscribes for such effect.		September 1, 2018	August 31, 2019
3. Create a centralized transparency portal for public trusts, that allows compliance with current regulations in matters of transparency and the provision of a new Law on Public Trusts.		September 1, 2018	August 31, 2020
4. Create a single portal of State Standards, which contains the regulations of the country with the formats of the Official Gazette and in open data format, with the updated references on the validity of the rules.		September 1, 2018	August 31, 2020
5. Update the database of the Non-Profit Associations administered by the Registry and Monitoring Unit of Civil Associations (URSAC) for the Creation of a Portal for Transparency and Accountability of NPOs, with support from URSAC.		September 1, 2018	August 31, 2020

2. STRENGTHENING OF MUNICIPAL MECHANISMS FOR THE GREATER ACCESS OF CITIZENSHIP TO PUBLIC INFORMATION	
September 01, 2018 – August 31, 2020	
Institute responsible for the implementation	Access to Public Information Institute (IAIP)
Description of the commitment	
Which is the problem that the commitment addresses?	At present day, the citizens demand accountability mechanisms from the government and municipal agencies to guarantee the effective use of the public resources they manage. One of the most important mechanisms for municipalities to comply with this rendering of accounts is through the publication of information in the Unique Portal of Transparency of the IAIP, in which to the date (July 17), 84 (28%) municipalities have entered the server.
What is the commitment?	Carry out the entry of all the 298 municipalities of the country to the Single Portal of Transparency of the IAIP through the use of education mechanisms to disseminate the necessary knowledge to the staff of the municipalities, serving in this way as liaisons with the IAIP.
How will it contribute to solve the problem?	The opening of Transparency Portals all 298 municipalities will help of members from the local communities to be able to exercise their right to access the information effectively, they will also provide information to municipalities governments with an state of the art accountability tool where they can provide quality information and comply with the provisions of the Transparency Law and Access to Public Information (LTAIP). Similarly, the preparation provided to municipal personnel through the non-formal information mechanisms will prepare them to respond effectively to the requests for information submitted by the applicants.
Why is it relevant to the values of the OGP?	<p>Transparency: The fulfillment of this commitment helps to provide more information to the general public through the publication of this information within the transparency portals of the municipalities, It will also facilitate requesting information from local governments and will also prepare professionals capable of meeting the requests presented.</p> <p>Accountability: Compliance with the commitment will improve in a significant way the capacity of local communities to be continuously accountable about the activities they perform. In the same way the appointment of the liaison with the IAIP will give that government official the necessary skills to meet the requests that are presented in their municipalities. The most important thing is that citizens are empowered in their right to access the information, and new spaces are enabled to guarantee the availability of the information requested.</p>
Additional information	The development of this commitment will be carried out through the development of courses of Transparency and Right of Access to Public Information with a focus on Municipal Management.

Activities and Deliverable Product		Starting Date	Ending Date:
1. Development of annual Diplomas to train personnel of the municipalities in the matters of Transparency and Law of Access to public information. (Number of new trained Public Information Officers)		September 01, 2018	August 31, 2020
2. . Incorporation of all 298 Municipalities within the Unique Portal of Transparency of the IAIP. (Number of new municipalities incorporated into the Single Portal of Transparency)		September 01, 2018	August 31, 2020

Commitment Template	
3. OPEN DATA FOR THE USE AND BENEFIT OF THE CITIZENS	
September 01, 2018 – September 30, 2020	
Institute responsible for the implementation	General Government Coordination Secretariat
Description of the commitment	
What is the problem that the commitment addresses?	There is an important advance in the country regarding openness of the information, however, there are only few institutions in the country that have opened their databases and have published them in portals and in an open data format. In our country there is still very limited use or even more the awareness of the benefit that can be obtained from the reuse of public data, it is mandatory for the country to move towards these new opportunities selecting the data and making it available to the citizens, it is necessary to co-create a process of platforms and policies ruling the subject.
¿Which is the commitment?	Co-creation of policies for the opening of an open data platform, selected through public consultation in the framework of the dialogue between the State and key stakeholders of the citizenship, providing valuable information for the use and benefit of citizenship. Achieve technical and legal regulations for the development of open data processes and their reuse, generating partnerships and agreements with the interested CSO, academy and private sectors to collaborate in the opening and use of the data.
¿How will it contribute to solve the problem?	The impact of this initiative of open data in Honduras, lies in the collective interest of the different actors, since it is aimed at promoting better projects with the use of data, with emphasis on the benefit of the citizenship, as well as to allow data to monitor and even achieve objectives within the plans of government or the international initiatives to which it belongs. The most important one is to make the largest number of data available to citizens relevant in the platform, which generates greater citizen participation for the selection and use of the data.
¿Why is it relevant to the values of the OGP?	<p>Transparency; The commitment helps the government institutions continue to provide public information effectively and continues to advance in granting this information to the citizen in a simple and transparent way, that is an open data format.</p> <p>Citizen participation; as more information is disclosed and the less complex are their formats, greater intensity is achieved in the involvement of the citizen in the decision-making process, or selection of authorities or other topics of social interest.</p> <p>Accountability; This commitment will allow a substantial improvement in the way in which the Honduran population receives and has information of various state entities, opening doors to more effective results in the future. Technological innovation; the development of an open data platform, allows all actors to have a useful tool for the use and reuse of data for their own benefit or that of their community.</p>
Additional Information	The relevance of this commitment is linked to the strategies prioritized in the framework of the Declaration to Consolidate Honduras in an Open State. It has the support of the World Bank for the design of the platform and Organization of American States OAS to promote the creation of the co-creation of open data policies in the country.

Activities and Deliverable Product		Starting Date	Ending Date:
1. Installation of multisector dialogue tables for co-creation of open data policy by applying modernization management methodology.		October 01, 2018	August 31, 2019
2. Identification and selection of data by key actors of the society, creating pilot data sets FOR EXAMPLE of: (i) Mining business (ii) Investment of public resources by regions and sectors (iii) Assets seized by the OABI (iv) INSEP investment in public works		October 01, 2018	August 31, 2019
3. Design and implement the Open Data Portal of the State, with permanent training to the citizens In the use of the data.		November 1, 2018	August 31, 2020
4. The State of Honduras adopts the international letter of open data.		January 1, 2019	August 31, 2020
5. Awareness campaigns and approval of the National Policy of Open Data		January 1, 2019	August 31, 2020

Commitment Template	
4. OPEN DATA IN PUBLIC WORKS PROJECTS	
September 01, 2018 – September 30, 2020	
Institute responsible for the implementation	Coordination of the Sectoral Cabinet of Productive Infrastructure
Description of the commitment	
What is the problem that the commitment addresses?	The contracting and execution of public works is one of the government activities most vulnerable to corruption due to the volume of transactions, the complexity of the processes and the variety of actors with same interests. As of 2014, the Government of Honduras has made significant advances in the publication of information on the entire cycle of public works projects, however, there are various systems in which information is published that is not interoperable with the other systems, generating many times dissimilar data in different platforms and confusion among users.
¿Which is the commitment?	Apply the Open Data Contracting Standard (EDCA) in the System of Information and Monitoring of Works and Supervision Contracts (SISOCS), guaranteeing interoperability between systems and access to the public information in an open data format.
¿How will it contribute to solve the problem?	<p>The coordination of the Productive Infrastructure Sector Cabinet with the support of the Transparency in Infrastructure Initiative (CoST) Honduras, will proceed mapping the SISOCS requirements to implement the EDCA having as reference the alignment of this with the Infrastructure Data Standard (IDS) of CoST.</p> <p>The SISOCS will be programmed so that it will be able to exchange messages or data in standard format with all other systems in which it is published information on public works projects through an API (Application Programming Interface), making them automatically interoperable. Use Cases will also be developed with the three sectors that are part of CoST Honduras Government, private sector and civil society. Once defined the Use cases will validate that the system responds to the information needs of the different users.</p> <p>Sectoral training will be provided to internal users so that they can administer the system and external users so that they can make use of the data according to their different interests: increase of efficiency of the processes, increase in competition between companies, improvement of the value of money and identification of corruption risks.</p> <p>The experience will be documented and an impact story will be developed to share with other countries that wish to implement both international standards.</p>
¿Why is it relevant to the values of the OGP?	This commitment is relevant to the value of transparency as it consists of improving the quality of the information that is published in the different platforms or systems on public works projects in their different stages from the planning, going through the contracting and execution stage until the reception of the works. In addition, this commitment helps improve access to information by the public.
Additional Information	The commitment budget is 25,000 US Dollars (USD): USD 3,000 for alignment between standards and development of use cases. USD 10,000 for SISOCS programming and to make it interoperable with other systems. USD 7,000 for training of different users. USD 5,000 for documentation of impact stories and their presentation.

Activities and Deliverable Product		Starting Date	Ending Date:
1. Mapping of SISOCs requirements based on the alignment between the Infrastructure Data Standard (IDS) of CoST and the Data Standard for Open Contracting (EDCA).		September 01, 2018	July 31, 2019
2. SISOCs programming in JSON language based on the extension of the EDCA for infrastructure and design projects of the API for interoperability with other systems.		September 01, 2018	August 30, 2019
3. Elaboration of use cases with members of the Multi sectorial group of CoST and validation of its application in the SISOCs.		September 01, 2018	June 30, 2019
4. Training Program to 4.1 internal users of all public institutions that use the SISOCs for the administration of the new platform. 4.2 external users for the use of the data generated in the SISOCs, according to the cases generated with members of the Multi sectorial Group of CoST.		September 01, 2018	June 30, 2019
5. Documentation of experience in the use of data by the members of the CoST Multisector Group and Preparation of impact stories and presentation of the stories of impact on relevant international events to share experiences and lessons learned		July 1, 2019	June 30, 2020

Commitment Template	
5. PROMOTE CIVIC ELECTORAL EDUCATION AND THE CREATION OF EQUAL CONDITIONS OF PARTICIPATION THE SOCIETY TO IMPROVE THE EXERCISE OF THEIR RIGHTS AND FULFILLMENT OF THEIR DUTIES IN DEMOCRACY	
September 01, 2018 – September 30, 2020	
Institute responsible for the implementation	Supreme Electoral Court
Description of the commitment	
What is the problem that the commitment addresses?	It is recognized the absence of a democratic electoral culture and the loss of values in the majority of the Honduran population, which causes lack of credibility in the institutions, their authorities and in the different political actors, hindering governance and participation in equal conditions. Reduce barriers and limitations in society to exercise the right and fulfillment of duties in democracy, achieve greater participation of people in vulnerability commissions in these electoral processes.
¿Which is the commitment?	Increase democratic culture by improving training processes and the reach of this programs, making them available to all citizens through face-to-face and virtual resources, developing a national program of innovative training in democratic civic values for children, young people and people in conditions of vulnerability. To improve the exercise of their rights and fulfillment of the duties in democracy it is proposed to design a database of people in conditions of vulnerability for their total inclusion in these processes.
¿How will it contribute to solve the problem?	Promoting civic and democratic values, as well as training that allows to establish the bases for the development of the way of thinking, attitudes and behaviors oriented towards a peaceful coexistence that contributes to a sustainable governance. Vulnerability can be overcome if the necessary instruments are developed so that the group and the individual that integrates this vulnerable group, improve their response capacity, reaction and recovery before serious violations of their basic rights occur. And in that context, develop instruments that guarantee the due participation of all citizens and generate greater confidence in the institutionality.
¿Why is it relevant to the values of the OGP?	Transparency; Make information and learning tools available to citizens, easy access to improve the knowledge and skills for contributing to the dissemination of information and the promotion of a democratic culture in equal conditions. Citizen participation; guarantee the right to vote of all people with disability, regardless of the type of disability (physical, intellectual, psychic or sensorial), it is relevant because it is a truly inclusive process. Accountability; generating mechanism that further incentivize citizen participation, also allows to generate more information about the processes and their results, which constitutes the obligation to render accounts for part of the institution, through these new mechanisms referred to in the commitment. Technological innovation; the creation of virtual tools that facilitate citizen empowerment of democratic civic values and a dynamic data base to ensure the greatest citizen inclusion in the process.
Additional Information	Approximate budget: 12 Million Lempiras, Linkage with other programs of government: Association of Indigenous and Afro-Honduran Peoples, People with Disability, Women and Older Adult Sector, Political Parties, Secretary of Education, Secretary of Human Rights, Civil Society, Other Vulnerable. Linkage with the national development plan or sector plans: The proposed commitment is aligned with the Country Vision Objectives: A Honduras that develops in a democracy, with security and without violence and specifically with goal 2.1 of this objective which refers to: Seven democratic process and continuous meetings held since 2009. And to one of the great challenges of this vision in terms of democracy,

		citizenship and governability. Linkage with the sustainable development goals (SDG): SDG 16: promote pacific and inclusive societies for sustainable development, facilitate access to justice for all and create effective, accountable and inclusive institutions for all levels.

Commitment Template	
6. INTEGRITY IN PUBLIC MANAGEMENT	
September 01, 2018 – September 30, 2020	
Institute responsible for the implementation	Superior Court of Accounts
Description of the commitment	
What is the problem that the commitment addresses?	The systems of integrity, probity and prevention of corruption are fundamental to reduce the risks of corruption in any society. In Honduras, these systems have positive advances, but a closer look allows to identify numerous problems that merit reforms or State actions. The TSC and the other institutions called to contribute in the diffusion of values and training to public servants, should deepen their commitment to education and knowledge of the mandates, dispositions, duties and prohibitions under the Code of Ethical Conduct, as an element of prevention. The Committees of Ethics should be strengthened so that they can meet effectively and efficiently its function. Well-trained public officials, are basic to consolidate a culture of integrity in public management.
¿Which is the commitment?	This commitment tends to the conformation of the high level technical support committees of the Ethics and Probity Committees of the institutions, in order to obtain the support from the authorities to achieve effective compliance with the regulations of probity and ethics in the country. Likewise, the design and implementation of a National Training Plan on the Code of Ethical Conduct with modern and innovative methods to achieve the broadest scope of officials at the national and local sector. Finally, the creation of an interinstitutional commission, to the effect of strengthening the capacity of the TSC. All of those recommendations of national and international order are meant to achieve a culture of integrity and to update the citizens of the different municipalities with the socialization of the document Municipalities of Solidarity Goods and their scope.
¿How will it contribute to solve the problem?	The State must develop the necessary tools for the mass education of public servants, including the adoption of a National Plan of Trainings and the necessary technological tools, such as platforms of online training, which allow evaluating the servers at their level of understanding of the teachings received. Public entities and their officials will have better accompaniment, on the monitoring and control by said institutions, in the process of consolidating an integrity system. It is essential that Honduras, under the leadership of the TSC, advance in the creation of experts in Integrity and Code of Public Ethics, that provide recommendations and strategies necessary to achieve these commitments.
¿Why is it relevant to the values of the OGP?	Transparency; completely empowered public servants, in full exercise of a culture of integrity, processes and results in public management are seen impacted in a positive way, which leads to greater transparency throughout the chain of administrative management. Citizen participation; citizens are involved in the construction of municipal instruments, and for the due follow-up in its implementation. Accountability; create actions that allow institutions to comply with the recommendations of national systems (SISERA) as well international (MESSESIC) and provide progress, achievements or challenges to citizens Technological innovation; creation of virtual tools that facilitate the empowerment and awareness of the public servant of an integrity system, regulations and applicable sanctions.
Additional Information	There is a link with the Sustainable Development Goal number 16 whose goals are focused on the promotion of peaceful and inclusive societies for sustainable development, access to justice for all and building effective and transparent institutions.

Activities and Deliverable Product		Starting Date	Ending Date:
1. Conformation of high level technical support committees from the Ethics and Probity Committees of the institutions for the fulfillment of its investigation function of infractions to the Code of Ethics.		September 01, 2018	August 31, 2020
2. Design and implement a virtual module of the National Plan of Training on the Code of Ethical Conduct and a face-to-face module, which allows its massive use for the scope of public servants at national and local level.		September 01, 2018	August 31, 2020
3. Set up an inter-institutional commission, in order to strengthen the capacity of the TSC to follow up on compliance with its recommendations on surrender of accounts and good governance, through the System of Monitoring of Audit Recommendations (SISERA), generating actions and results report.		September 01, 2018	August 31, 2020
4. Update with citizen participation from the municipalities and Socialize the document Municipalities of Solidarity Goods, accompanying instruments and methodology that contribute to the empowerment and due compliance of the process.		September 01, 2018	August 31, 2020

Commitment Template			
7. MUNICIPAL ELECTRONIC CATALOGS AND STATE PURCHASE PLATFORM WITH CITIZEN PARTICIPATION MODEL			
September 01, 2018 – August 31, 2020			
Institute responsible for the implementation	Secretary of General Coordination of Government DPTMGD / National Office of Contracting and Acquisitions of the State (ONCAE)		
Description of the commitment			
What is the problem that the commitment addresses?	Few tools that facilitate the control and monitoring of purchases at the municipal government, for the due involvement of the citizen in the process, Insufficient transparency in public purchases of the municipal sector and the need for greater openness to the different sectors involved in the procurement processes and State Acquisitions, in order to consolidate citizen oversight in these processes.		
¿Which is the commitment?	Creation of four (4) municipal electronic purchase catalogs and the design and implementation of Honducompras 2.0 with the citizen participation module, interoperable with other key systems of the state. Harmonizing our procurement and acquisitions processes to international standards and promoting participation mechanisms and incentives for transparency in State contracts.		
¿How will it contribute to solve the problem?	Transparent municipal spending on purchases and hiring of goods and services, with greater local impact. Through the open and competitive process of public selection, that the ONCAE performs from the suppliers that offer a catalog of electronic purchases, it will be allowed to locally select suppliers that contribute directly to the economy in the community. And all purchases made through the tool are automatically published on the ONCAE citizenship portal. As well with the new purchasing system, it will allow even greater citizen participation in the oversight of the grants and implementation of the contract.		
¿Why is it relevant to the values of the OGP?	Transparency; The commitment is to publish more information, improve the quality of it, contemplating an exclusive module for the promotion and Involvement of citizens in the purchasing and procurement processes of the State. Strengthening municipal catalogs to make transparent purchases at the municipal level. Citizen participation; The commitment is to create or improve opportunities or the capacities of the public to influence the transparency of the processes and that the adjudication of the same is done in a fair manner and according to the law and that it creates spaces for participation and favorable conditions for civil society and all sectors involved in the subject. Accountability The commitment is to create or improve rules, regulations and mechanisms to require public officials to render accounts about their actions, and especially in the municipal corporations, making use of electronic means for greater effectiveness.		
Additional Information	Strategic partnerships with international cooperations for the design and implementation of the referred commitments. Also, with key sectors of the society.		
Activities and Deliverable Product		Starting Date	Ending Date:
1. Design and implementation of electronic municipal catalog 1 and 2, contemplating the incorporation of accountability mechanisms and citizen participation		September 01, 2019	December 30, 2019
2. Design and implementation of electronic municipal catalog 3 and 4, contemplating incorporation of mechanisms for surrendering		January 01, 2020	August 31, 2020

accounts and citizen participation			
3. Adhere to the Open Contracting initiative of the Alliance for an Open State, as a way to raise national standards on public and transparent procurement.		September 01, 2019	August 31, 2020
4. Create the National Prize for Public Works Contracts, in which the institutions that have the best practices in the subject of citizen follow-up, get rewarded.		September 01, 2019	August 31, 2020
5. Design and implement Honducompras 2.0, a module of citizen participation, and broad citizen oversight of the State contracting processes.		September 01, 2019	August 31, 2020

Commitment Template	
8. OPEN CONGRESS GREATER OPENING TO ACCOUNTABILITY	
September 01, 2018 – September 30, 2020	
Institute responsible for the Implementation	Sovereign National Congress of the Republic of Honduras
Description of the commitment	
What is the problem that the commitment addresses?	The trust of citizens in their parliamentary institution is a necessary condition for the proper functioning of the democratic system, especially because the congresses are the instances in which the laws are deliberated and prepared by representatives of the people. For this reason, it is urgent to develop technological instruments to bring the National Congress closer to the citizens and in that way inform in an expeditious, timely and efficient manner, the work that the Congress performs daily. It has been demonstrated the need for citizens to be involved in the processes of taking decisions, there is also a tendency to decrease the levels of trust of the citizens in the institutionality. The citizens are demanding more transparency, more civic participation and mechanisms for greater transparency, receptivity, accountability and effectiveness.
¿Which is the commitment?	Develop a mechanism to open the dialogue and promote citizen participation, through the use of digital tools for monitoring and tracking the projects subject to deliberation of the citizenship, obtaining better inputs to implement those projects that are a real priority for the citizens and their communities. Also, to open spaces for surrender of accounts and direct dialogue with citizens.
¿How will it contribute to solve the problem?	The development of inclusive, innovative, dialogue and alliance programs managed by congressmen, promote the highest political commitments to advance in the legislative work towards the opening of an Open Congress, in virtue of which these acquired commitments contribute to the strengthening of our democratic institutions. To restore the confidence of the citizenship, the National Congress must lead by example and involve citizenship in legislative processes.
¿Why is it relevant to the values of the OGP?	Transparency; Make available tools and spaces for citizen information, that brings the citizen closer with their representatives and that they are of easy access to improve knowledge, contribute to the dissemination of information and the promotion of a culture of transparency and accountability. Citizen participation; guarantee the active collaboration of the different sectors of the country, creating opportunities for citizen participation in the decision-making processes, thus promoting the greatest direct benefit to the communities. Accountability; Citizen participation mechanisms are encouraged, and accountability to achieve greater closeness with citizens and increase confidence in the institutionality. Technological innovation; this commitment allows the creation of tools that facilitate citizen empowerment of the actions of the national congress and achieve active citizen participation.
Additional Information	There is an intrinsic link between inclusive governance structures and achieving sustainable development. So this commitment is linked to the Agenda 2030, specifically in Sustainable Development Goal number 16 whose goals are focused on the promotion of peaceful and inclusive societies for sustainable development, access to justice for all and building institutions effective and transparent where women and historically marginalized groups are equitably represented and their voices heard. Account at all levels of decision-making processes.

Activities and Deliverable Product		Starting Date	Ending Date:
1. Develop and place in operation an interactive digital platform system that allows: Consultation of major projects of impact for the citizens, that facilitates the dialogue, proposals and recommendations of citizens with their representatives in the National Congress.		September 01, 2018	August 31, 2020
2. Permanent training program on the principles and government practices of an open congress with the staff of the Legislative Organization.		September 01, 2018	August 31, 2020
3. Design and implementation of a mobile application that facilitates the citizen the access to the information of the most relevant issues developed by the congress, for example; the minutes of the sessions of the Congress and the work teams (Legislative work units) of each congressman.		September 01, 2018	August 31, 2020
4. Carry out two Innovative Trade Shows of Transparency and Surrender of Accounts of the National Congress each year, in which there is invitation to civil society organizations, citizens, the private sector and the academy.		January 1, 2019	August 31, 2019 August 31, 2020
5. Implement the principles of the Open Parliament program and be an active member of the Open Parliament Network of ParlAmericas (RPA) that promotes legislative opening and whose purpose is to increase transparency and access to public information, strengthen the accountability of democratic institutions, and promote the participation of citizens in decision-making processes.		September 01, 2018	August 31, 2020

Commitment Template	
9. ISO 9001 CERTIFICATION TO GOVERNMENT SOCIAL PROGRAMS	
September 01, 2018 – September 30, 2020	
Institute responsible for the Implementation	Development and Social Inclusion Secretariat
Description of the commitment	
What is the problem that the commitment addresses?	The socioeconomic situation and vulnerability of Honduran families, families living in conditions of poverty in the urban areas of the country and family groups, regarding their economic, demographic, health, school, territorial, family, work status and housing. This variate assesment of social vulnerability, requires the Government to generate social aid mechanisms. There are only few transparent participation and citizen control mechanisms in the programs or projects linked to poverty reduction and social development.
¿Which is the commitment?	Certification with ISO 9001, of the social program Better Life Bonds, which is given to 200,000 Honduran beneficiaries, who are under 18 years of age, enrolled in a Public Institution, with assistance and optimal performance in school, or in conditions of Poverty and Extreme Poverty at the national level. The design of a virtual platform with a citizen module for the publication of information of the social bonds granted by the government to the citizens and, the strengthening of technical capacities to achieve the transition of artisans to Micro entrepreneurs, with the technical assistance of the INFOP.
¿How will it contribute to solve the problem?	The ISO 9001 standard is a world benchmark, it provides the infrastructure, procedures, processes and resources needed to help the organizations to control and improve their performance and lead them towards efficiency. Generate greater transparency in the Better Life Bonds, which promotes a better quality of life for families living in conditions of poverty in the urban areas of the country, and thus ensure access to education of girls and boys in Honduras, greater citizenship reliability is achieved in the administration of this bonus to those who need it most.
¿Why is it relevant to the values of the OGP?	<p>Transparency; Access to information through appropriate application and awareness, promote a real strengthening in the participation and citizen empowerment of social control and with a substantial improvement in the performance of institutions.</p> <p>Accountability; empowered citizens by the information from management of social programs, generates greater citizen confidence and this contributes to the improvement of the performance of programs or social bonds granted by the government.</p> <p>Technological innovation; the use of international certification systems and creation of platforms available to the public represent an advance in the tools that the government makes available to the public to generate greater social control over these granted benefits.</p>
Additional Information	There is a link with the Sustainable Development Goal number 16 whose goals are focused on the promotion of peaceful and inclusive societies for sustainable development, access to justice for all and the construction effective and transparent institutions.

10. CITIZEN EMPOWERMENT IN NATIONAL AND LOCAL FISCAL AND BUDGETARY MANAGEMENT	
September 01, 2018 – September 30, 2020	
Institute responsible for the Implementation	State Secretariat in the Finance Office, State Secretariat in the Governance, Justice and Decentralization Office, General Government Coordination Secretariat
Description of the commitment	
What is the problem that the commitment addresses?	Regarding fiscal transparency, the Government of Honduras has taken some initial steps aimed at expanding citizen participation in the budget cycle, through public hearings and publication of the national budget in a language understandable to citizens, among others. In the territorial order, citizen participation in the construction of local budgets is very scarce. In accordance with the Open Budget Index of the Open Budget Initiative, Honduras publishes information related to the budget in a "Limited" way, with a score of 43 out of 100. It is clear then that Honduras could take much more steps decided to open the entire budget cycle to the citizens, with guarantees of transparency and broad and plural debate. Also, it could make decisions to promote Participatory budgets in the municipalities.
¿Which is the commitment?	Implementation of a strategy aimed at increasing citizen participation in the preparation, discussion and approval of the public budget of the State and the municipalities, designing and socializing friendly versions of budgetary documents or fiscal measures for the awareness raising and empowerment of participation. It also encourage spaces for dialogue and inclusive participation in the instances of municipal open councils for the citizen empowerment of the budgets and fiscal transparency. To adopt Good Practices in the promotion of Fiscal Transparency and forming technical capacities in the citizens in the Building of Budget by Results
¿How will it contribute to solve the problem?	Citizen participation in the budget cycle is a necessary element for the good functioning of democracy and to recover the confidence of the population in the institutions. Participate in the preparation, revision, negotiation, approval and budget execution, at the national and territorial levels, empowers the citizen, makes them responsible, owners of their destiny and wealth as a society. In Honduras, this participation is essential to promote, opening new spaces of communication, knowledge of the information in a similar condition of access to information, and training citizens and public servants in this type of processes through various initiatives, including holding workshops for the construction of participatory budgets. This commitment drives the need of moving towards the design of an approval methodology and increase of budgets by results, that seeks to reward good budget execution and success in results in the administration of the State
¿Why is it relevant to the values of the OGP?	Transparency; The fulfillment of this commitment helps to provide more information to the general public through the publication of the same within the portals and will also provide information to local governments. Citizen participation; This commitment tends to achieve the greatest participation of citizenship in the design and construction of public policies, planning and approval of budgets and in the discussion of matters of interest, at the municipal and national level, with incidents in the decision-making process. Accountability; Compliance with the commitment will improve significantly the capacity of local communities to be continuously accountable about the activities they perform. Technological innovation; new spaces and electronic mechanisms are enabled to guarantee the availability of information.
Additional Information	There is a link with the Sustainable Development Goal number 16 whose goals focus on the promotion of peaceful and inclusive societies for sustainable development, access to justice for all and building effective and transparent institutions It is linked to national and international commitments, in which we is measured the efficiency in spending, such as PEFA and OBI initiatives.

Activities and Deliverable Product		Starting Date	Ending Date:
1. Adopt the Code of Good Practices for Fiscal Transparency from the International Monetary Fund of 2007 and set up a Follow-up Commission for the implementation of good code practices. (https://www.imf.org/external/np/fad/trans/spa/codes.pdf)		September 01, 2018	August 31, 2020
2. Design a Citizen Guide to Building Budgets by Results, for the formation and empowerment of the citizenship in the matter.		September 01, 2018	August 31, 2020

11. PARTICIPATION AND EMPOWERMENT OF CERTIFIED WOMEN IN ROAD INFRASTRUCTURE PROJECTS, PUBLIC WORKS AND MITIGATION WORKS	
September 01, 2018 – September 30, 2020	
Institute responsible for the Implementation	Infrastructure and Public Services Secretariat (INSEP)
Description of the commitment	
What is the problem that the commitment addresses?	Women's access to productive work is restricted, being a social reality that the Honduran woman is the head of the family at a high number of households, so it is essential to generate economic income. It is also important to combat inequalities, remove gender barriers that prevent women from entering non-precarious working conditions markets, especially of mothers, which is the responsibility of the State, but also to society as a whole. These barriers are unequal patterns of access, participation and control over resources, services, opportunities and benefits. The Open State suffers from a lack of representation of women in the field, Especially in job opportunities exclusively cataloged as labor for men.
¿Which is the commitment?	Training and empowerment of more than 100 Honduran women to achieve their certification in agreement with the Vocational Training Institute INFOP, in order to achieve a higher rate of properly certified women incorporated in the labor area specifically in the areas of Road infrastructure, Public Works and Mitigation Works.
¿How will it contribute to solve the problem?	Reducing the existing gap in the construction area, training to women and inserting them in the areas of road infrastructure, Public Works and Mitigation Works. Equal opportunities are promoted, respect for diversity and access to the labor market for the most vulnerable groups. Leadership and motivation, which can be caused by these projects involving men and women, in which each woman is competitive with herself so that when opportunities are presented be prepared to face the challenges, with the due preparation available to all, we can contribute to achieve the gender equality, autonomy and the empowerment of women.
¿Why is it relevant to the values of the OGP?	<p>Transparency; the government is opening spaces to position the leading woman opening the way for an inclusive and diverse future in labor areas, with all the necessary transparency mechanisms, including a mechanism that denounces in case of non-compliance or abuses to women's rights.</p> <p>Citizen participation; this commitment is relevant in virtue of the contributions to the greater participation and inclusion of Honduran women in labor processes cataloged by society as exclusive of the man, will insert women into the labor market, especially in the government sector, empowering women in the development of activities of the infrastructure sector by implementing the equity of Gender.</p>
Additional Information	This commitment affirms and links actions with the priority of the implementation of the gender policy in the country, has a budget allocation planning for the year 2019. It is linked to the creation of employment in the productive infrastructure sector through the projects executed.

12. ADMINISTRATIVE SIMPLIFICATION WITH ON-LINE PROCESSES AND CITIZEN COMPLAINT SYSTEM	
September 01, 2018 – September 30, 2020	
Institute responsible for the Implementation	Secretariat of General Coordination of Government. Presidential Designee Office
Description of the commitment	
What is the problem that the commitment addresses?	Companies and people face efforts, time and high costs in negotiations with the public administration, to carry out its administrative acts, which impose burdens and loss of competitiveness, contributing negatively to the informality, subtracting the potential for sustainability of companies, generation of employment and economic growth. There is no platform for following-up the administrative processes or procedures.
¿Which is the commitment?	Work in an integrated manner and in coordination with the Presidential Designee and the public institutions, in the development of a comprehensive simplified administrative plan that includes approval standards, digital government platforms, citizen complaint system, institutional interoperability and electronic signature in the facilitation of the administrative processes.
¿How will it contribute to solve the problem?	Reduction of time, process, documents, costs in administrative procedures with the government, that will eliminate discretion, acts of corruption and will allow a greater efficiency of the State and consequently a better climate for the business to facilitate the investment. The process of administrative simplification, eliminates duplicities and reinforces cooperation mechanisms in order to rationalize the cost of administrative activity. It is a valuable action aimed at doing the action of the public administration more easy, simple and less complicated and the with the effective result that citizens expect in their procedures.
¿Why is it relevant to the values of the OGP?	<p>Transparency; increase the efficiency, effectiveness, functionality and safety of any administrative process, which makes a State more agile and transparent in its daily management for the citizens.</p> <p>Citizen participation; The State must not only simplify, but must put available to citizens, information about their rights and the way in which to exercise them, in order to transform each citizen into an agent of simplification. It's foreseen the creation of mechanisms oriented in that sense. Promoting the citizen participation either as a user or beneficiary of public services or as a legitimate participant in the formulation, execution and control of public policies under the principle of social co-responsibility.</p> <p>Accountability; contribute to the optimization of the costs of current administrative procedures for the benefit of citizens, having institutions the opportunity to render an account of what was done and saving time with the simplification in its administrative management.</p> <p>Technological innovation; develop platforms and mechanisms that automate processes that consolidate us in a reliable and efficient electronic government. Online procedures generate accountability, in virtue that On-line procedures does not allow intermediaries and the access to the process is open.</p>
Additional Information	The citizenship has identified the main procedures that affect the operability of companies, such as, registration of companies, environmental licenses, building permits, health records, phyto-zoo-sanitary registry, property registers, payment and tax refund, which facilitates the process and achievement of result in the shortest time. Issues related to the SDGs, Objective # 16.

Activities and Deliverable Product		Starting Date	Ending Date:
1. Subscription of MACCIH-SCGG-Designated Presidential Office and COHEP (Honor witness) agreement; To define and implement a program of procedure simplification in public administration. 13. CO-CREATION AND CITIZEN IMPLEMENTATION OF INNOVATION PROJECTS CITIZEN INNOVATION LABORATORY	
September 01, 2018 – September 30, 2020	
Institute responsible for the Implementation	Secretariat of General Coordination of Government. Presidential Directorate of Transparency, Modernization and State Reform
Description of the commitment	
What is the problem that the commitment addresses?	The lack of spaces where any citizen can participate, together with others to collaborate, especially with government institutions, sharing their knowledge, ideas and experiences in order to generate projects in which it is possible to experiment solutions or proposals with the aim of improving situations of the most diverse nature.
¿Which is the commitment?	Implementation of the citizen innovation laboratory, with a focus on development and co-creation of social and cultural projects with direct benefit to the community, and the development of projects in support of the improvement of public services. Empowerment of public officials (Network of Honduran innovators) in reference to innovation and its benefits for the improvement of administrative management and the approach to citizenship and to work together for the identification and development of possible solutions of different nature
¿How will it contribute to solve the problem?	This commitment contributes with concrete solutions in the short term and the best of it, is that they are co-created with the citizen. They are projects that work on issues of transparency, citizen participation, technological solutions to specific problems, improvements in social, ethnic or cultural issues, urbanism, ecology, among others. Anything a society, city or community can improve for its inhabitants, this initiative responds creating way and working together with the citizens in public institutions. The interesting thing about this instance is that it is the citizens who participates directly and makes them work, they are spaces not only to experience projects, but also they are under experimentation, that is, that they must have the ability to change quickly, assimilate errors and rehearse new formulas in the model management.
¿Why is it relevant to the values of the OGP?	Transparency; This commitment has a special and outstanding feature in this process and is that citizen laboratories are necessarily open spaces for the citizen, so it is imperative the evident generation of all kinds of transparency mechanisms in the process and its results. Citizen participation; The commitment focuses on people, in highly collaborative and inclusive, innovative, and open processes that are developing so that we rethink our institutions and take advantage of the importance of the resources of the country, the citizenship and the community co creating for the general welfare. Accountability; The commitment is important in the issue of surrendering accounts, since every project generated in this instance is of public knowledge and with the intervention of several actors, these co-creation citizen models are more interactive and innovative. Citizen Innovation laboratories are possibly the best example of these new institutions to which we are going.
Additional Information	The relevance of this commitment is linked to the strategies prioritized in the framework of the Declaration to Consolidate Honduras in an Open State and the national transparency strategy and it has the support of the European Union.

Activities and Deliverable Product		Starting Date	Ending Date:
1. Implementation of the citizen innovation laboratory with 5 social, cultural or artistic projects of impact in the community.		September 01, 2018	August 31, 2020
2. Create a network of public officials innovators, train them and empower them to lead processes of co-creation with citizens and for the implementation of impact projects.		January 01, 2019	August 31, 2020

14. MUNICIPAL AND BUSINESS PLANS WITH FOCUS ON HUMAN RIGHTS EMPOWERING OFFICERS AND ENTREPRENEURS	
September 01, 2018 – September 30, 2020	
Institute responsible for the Implementation	Secretariat of Human Rights
Description of the commitment	
What is the problem that the commitment addresses?	Public servants with low level of knowledge of human rights. Most of the population that lives in a vulnerable situation are served by Municipalities in a deficient manner and in some rural municipalities, they are in an abandonment situation. This situation is largely due to the lack of knowledge that the municipal governments have of the commitments assumed by the State of Honduras in the field of Human Rights, of the standards in the matter and in a general way of universal planning guidelines with a focused approach in Human Rights. Finally, the private sector is considered the engine of the country, generates employment and income for families through their activities, and in many cases the lack of compliance with the human rights is evidenced. Human Rights that by law and international agreements are to be recognized and respected.
¿Which is the commitment?	Train public servants in human rights, in order to foster a culture of respect for them in State spaces at regional and local level. Design in a joint way with the private sector, an instrument to promote and guarantee human rights in the private sector. Promote the Certification of Municipalities in the implementation of municipal plans and budgets with a human rights-based approach, with a methodology pre-designed that encourages citizen participation and accountability.
¿How will it contribute to solve the problem?	Situations reported as abuse, denial of service, exclusion for any reason in particular, can be prevented with training and education in human rights to public servants and the population, especially those people who are part of groups traditionally placed in conditions of vulnerability. Likewise, strengthening the development plans and budget of the municipalities with a priority focus on human rights, as well as achieving a comprehensive vision with the private sector including in its business plans actions aimed at strengthening the fulfillment of human rights. Being able to consolidate the mechanisms of compliance with the laws and agreements to which Honduras is a subscriber in the field of human rights.
¿Why is it relevant to the values of the OGP?	Transparency; The initiative will allow to expose publicly and directly information of the progress of public policy on human rights, of actions or implementation of the Municipal Development Plan and the Private Enterprise and Human Rights resources plan, tools and processes will be developed for what is guaranteed to citizens, businessmen and workers access to information. Citizen participation; To ensure the development of these processes, it is planned the development of skills in the subject, and participation in the plans both at the of State institutions as well as citizenship level. Accountability; once the business plans and municipalities have been developed, within the framework of its implementation, the scope and achievements in terms of of human rights must be socialized in the community. Technological innovation; for the dissemination of achievements, compliance and progress of the public policy in the field of law, there will be an installation of a special module on the platform of the public information access portals.
Additional Information	The alignment will be established with: Public Policy and the National Plan of Action in Human Rights, National Human Rights Education Plan of Honduras. (in the process of revision and adjustments for socialization), Sustainable Development Goals with the no. 4 and the no. 16, Strategic Education Plan.

(Teacher training), The implementation of the Plan will depend on a partnership of technical, specialized HHRR, logistics and material resources of the Human Rights Secretariat and the Honduran Council of Private Enterprise. This initiative contributes to the Objective 3: Productive Honduras that generates opportunities and decent jobs, which takes advantage of its natural resources in a sustainable way and minimizes its environmental vulnerability.

Commitment Template	
15. OPEN JUSTICE DIGITAL FILE FOR GREATER TRANSPARENCY IN THE PROCESS	
September 01, 2018 – September 30, 2020	
Institute responsible for the Implementation	Supreme Justice Court
Description of the commitment	
What is the problem that the commitment addresses?	The administration of justice is one of the pillars upon which any Rule of Law State rests. For it to work well, judicial operators are required to be honest and transparent, as well as institutions that are accountable and also respect and comply with the duty of transparency. It is necessary to continue to strengthen the Judicial Branch, making it more democratic, inclusive and participatory; this will decrease the opacity that has characterized the judicial function during the past century, and that still faces challenges of greater transparency and openness to the public opinion. Continue with the process of consolidating an open state that needs this public jurisdictional processes, understandable and publicly published verdicts.
¿Which is the commitment?	Develop open judicial government strategies that allow this power of the State to work on the values of OGP; Transparency, citizen participation, accountability and technological innovation in a collaborative way, in particular on the use of technologies and openness of information. Development of the Digital File, which guarantees greater transparency and decreases corruption and increases the confidence of the citizenship. Development of permanent training to the operators of justice, about the importance of the Open State and its scope and finally mechanism or spaces for dialogue with citizens to be accountable of the actions, main achievements and challenges of Justice in the country.
¿How will it contribute to solve the problem?	The commitments contemplated in this policy promote a cultural change in The Judicial Power, oriented to the openness and transparency of its actions, it will allow to inquire into the current status of the actions executed on the subject in the different areas of the institution. This can be achieved through clear leadership of the superior authority in this regard, the training of human resources, the separation between administrative and jurisdictional functions in the courts and between others, valuable actions that add up to achieve an authentic open justice. Open Justice does not imply a simple observation of the public, but a true participation of the same, and understands the importance of giving access to the archives.
¿Why is it relevant to the values of the OGP?	Transparency; Make available to the citizens tools and spaces for information, easy access that improve knowledge, which will contribute to the dissemination of information and the promotion of a culture of transparency and accountability. Citizen participation; empowered citizens in each stage of the process, with spaces of interaction that favor the legality and speed of the process. Accountability; The creation of a mechanism for the surrender of accounts that allow to increase the confidence in the institutionality. Technological innovation; this commitment allows the creation of tools that facilitate citizen empowerment of the actions of the Supreme Court of Justice and achieve an active citizen participation.
Additional Information	There is a link with the Sustainable Development Goal number 16 whose goals are focused on the promotion of peaceful and inclusive societies for sustainable development, access to justice for all and building effective and transparent institutions.

16. FORMING AMBASSADORS FOR TRANSPARENCY WITH THE EDUCATION SECTOR AND STRATEGIC ALLIES ONLINE BIRTH CERTIFICATE FOR THE REGISTRATION PROCESSES	
September 01, 2018 – August 31, 2020	
Institute responsible for the Implementation	State Secretariat in the Office of Education
Description of the commitment	
What is the problem that the commitment addresses?	<p>The problem of corruption is not just a problem in the public sector. Conversely, It is first and foremost a social phenomenon. It is in society and its behaviors, values and patterns of behavior, where the germ of corruption lies. For that reason, Honduras will have to make real efforts to promote a greater culture of integrity in citizenship and civil society. This implies involving the entire education apparatus of the State in the formation of better citizens, attached to values of integrity, honesty and care of the public. This strategy requires efforts on the schools in the primary, secondary and preparatory level, as well as on higher education centers, with the support of the Ministry of Education, SCGG through the DPTRME, the TSC, the IAIP and public and private academy. It also demands efforts in terms of co-responsibility of the media, which are indispensable for reaching the bulk of the population.</p> <p>On the other hand, citizenship, especially the parents, requires that the process of registration and request for documents to be the less complex as possible and for this process to be expedited, reducing acts of corruption with the payment of processors to obtain birth certificates.</p>
¿Which is the commitment?	Comprehensive training of children and young people as school controllers, in the Law of Transparency and Access to Public Information and the principles and scope of an open state, empowering them as ambassadors for transparency in the Public Management. In addition to this effort to empower citizens, the design and implementation of the Work Plan for the Culture of Integrity in the Media. Finally to improve the public service of school enrollment processing, eliminating the requirement of birth certificate presentation, simplifying it through a strategic alliance between the RNP- SEDUC and the District Education Offices.
¿How will it contribute to solve the problem?	Honduras achieves a great cultural transformation that consolidates ethics and integrity as main social values. In particular, that transformation should materialize in the behavior of public servants, the private sector, children and young people, who must also have a high level of respect for the rule of law. In this process of change, the academy, the news media, and all public and civil society institutions are called to fulfill a leadership role. Honduras must contain and reverse the proliferation of the excess of procedures. It must do so in the hands of the citizens, who must help identify the procedures that generate more problems and that could be eliminated or simplified, either through legal, procedural or with technological innovations, which is addressed in this commitment, in relation to a specific procedure for the registration process.
¿Why is it relevant to the values of the OGP?	<p>Transparency; awareness is raise in the citizens to guarantee the due compliance with the law on transparency and access to public information. Likewise it impacts in achieving greater citizen participation; involvement of children and young people in the process of promoting and complying with transparency regulations and right of access to information in the country and with the principles of an open state. Accountability; the institutions will be accountable to the ambassadors for transparency as a mandatory part of the process of empowering these important actors.</p> <p>Technological innovation is achieved; making use of the news media and innovating in the process of sensitization of citizens in relation to the promotion of transparency.</p>

Additional Information		There is a link with the Sustainable Development Goal number 16 whose goals are focused on the promotion of peaceful and inclusive societies for sustainable development, access to justice for all and building institutions effective and transparent.

Commitment Template	
17. IMPROVEMENTS IN THE REGULATORY FRAMEWORK AND THE STATE HUMAN RESOURCE MANAGEMENT CAPACITY	
September 01, 2018 – August 31, 2020	
Institute responsible for the Implementation	General Directorate Of Civil Service (DGSC) Secretary of State in the Presidential Office
Description of the commitment	
What is the problem that the commitment addresses?	Honduras must improve the regulatory framework for hiring, classification and management of the human resource of the State. The legal framework in which it is currently working is outdated, obsolete and unresponsive to the present needs of Honduras. For this reason, the analysis and studies of a new legal framework must be updated based on international best practices and the recommendations of MESICIC, which has pronounced itself on the problems and gaps in the legal framework and the current situation. Among other actions, Implementation of this strategy requires strengthening of the civil service regime, promoting the necessary reforms in the matter. It requires a transparent follow-up and monitoring mechanism with access for citizens to know the process and the stage in which the appointments of the public workers are due.
¿Which is the commitment?	Constitution of a panel of experts that defines the roadmap to follow for implementing the integral reform of the Honduran civil service. The panel of experts must deal with addressing in a comprehensive manner all the problems of the public service, including civil service and special regimes. To complement this process of an expert panel, it is considered a priority the design and implementation of a virtual monitoring and tracking module (Tracking) of the processes of appointment of public servants who will perform in a charge of public administration.
¿How will it contribute to solve the problem?	The fulfillment of this commitment is relevant to be able to take the first steps in the long road that is required to consolidate a sustainable civil service regime, transparent and beneficial to the population, it entails the implementation of a long-term strategy that will also require the promotion of a Portal of Public State Employment, which improves equity in access to vacancies in the State. It will also demand the improvement of human resource management tools, with the appropriate technological instruments; and the permanent training to public officials, in the main aspects that should be know in their capacity as officials. It will allow every citizen who aspires a position in the administration to follow up in real time the progress of the process for the issuance of the appointment agreement in the place to be filled in the administration.
¿Why is it relevant to the values of the OGP?	Transparency; The purpose of the table is to develop an innovative and transparent mechanism to be able to improve the regulatory framework and the State's capacity of human resource management. As well, mechanisms for access to information, such as "Tracking" or follow-up in the process of hiring of public servants in places of appointment by agreement. Citizen participation; citizens with option to have contract in a government position, may be involved in the direct follow-up of their hiring process, a process that in the present day is very opaque and scarce of information. Technological innovation; this commitment allows the creation of tools that facilitate the citizen's empowerment in the processes of hiring in government positions.
Additional Information	There is a link with the Sustainable Development Goal number 16 whose goals are focused on the promotion of peaceful and inclusive societies for sustainable development, access to justice for all and building effective and transparent institutions.

Activities and Deliverable Product		Starting Date	Ending Date:
1. Create a Panel of Experts to improve the civil service of Honduras, under the coordination of the DGSC, which will recommendations and proposals to strengthen the system of hiring of human resources, to achieve a process of selection by merit, that is highly transparent and competitive. It will have the technical support of the SCGG.		September 01, 2018	August 31, 2020
2. Design and implementation of a virtual platform, with a monitoring and monitoring module, through a direct ticket for the interested citizen of the procedure that are in process within the DGSC, specifically in the stage that is finds the appointment agreement in a place in the public administration. Commitment Template	
18. NATIONAL PATIENT RESPONSE AND REFERENCE SYSTEM ELECTRONICAL CLINICAL RECORD (ECR)	
September 01, 2018 – September 30, 2020	
Institute responsible for the Implementation	Secretary of State in the Health Office
Description of the commitment	
What is the problem that the commitment addresses?	Patient information is scattered and with little adherence to standard criteria, so that medical follow-up is difficult. Doctors do not have documentary references for a diagnosis at the opportune moment, so that diagnosis or procedure sometimes do not conform to the established medical guidelines, affecting the patient's health. Difficult procedures, with long waiting times and high cost, due to poor communication between institutions. Duplication of laboratory and imaging studies, due to the lack of availability of results between institutions (and sometimes even within them). Paperwork to request a study or medical order. Difficulty in making a diagnosis assisted by a specialist remotely.
¿Which is the commitment?	Implementation of the referral system, response and follow-up of patients , from community, to district, regional and national reference hospitals, using information and communication technologies, in order to make them more accessible, relevant and timely, health services to the rural, indigenous and postponed population from the country. In this sense, the electronic clinical record (ECR) is also promoted, which allows to ensure that patients receive the most appropriate, convenient and efficient health care. The ECR is a tool that offers information about medication, the history of the patient, the clinical protocols and recommendations of specific studies; generates an increase in the efficiency in the tracking of clinical history and preventive care; and helps reduce complications including errors in the medication
¿How will it contribute to solve the problem?	Through the electronic clinical file you can provide more complete information to doctors and health personnel, as well as enabling communication at the moment between different medical units. The electronic clinical file also uses messaging in accordance with international standards to interact with Systems such as Laboratory, Blood Bank, Imaging and Hemodialysis among others. It also allows to securely exchange information with other institutions under interoperability standards. All the above comes to facilitate the immediate attention to patients who have been treated in a medical center and are referred or transferred to another center of assistance, so they can have the information on the clinical history of the patient in a short time and with easy access, which facilitates their treatment.
¿Why is it relevant to the values of the OGP?	Transparency; Quick and easy access to information on which the research is based, which benefits the citizen directly, by virtue of what is achieved with greater ease, for the integration of patient information and to give continuity to the medical assistance. Citizen participation; Greater credibility and confidence of the citizen and therefore greater commitment of the population in the care of their health through access to their medical information. Accountability; Better quality in the provision of health services, the concurrence of the various hospital services and better quality in the provision of Health services Technological innovation; the use of technology and communications, allows the Reduction of costs for unnecessary and / or redundant treatments or studies.
Additional Information	There is a link with the Sustainable Development Goal number 16 whose goals focus on the promotion of peaceful and inclusive societies for development sustainable, access to justice for all and building effective and transparent institutions.

		<p>-The costs of resources, devices and methods necessary to optimize the acquisition, storage, recovery and use of health information and biomedicine are considerably reduced.</p> <p>-the benefits obtained by the implementation of an Electronic Clinical File are mainly reflected in the increase in productivity: minimize file personnel by nullifying searches in physical files; it decreases the time in the appointment allocation; the lost of files is eliminated and in institutional stationery savings.</p>

Commitment Template	
19. SUSTAINABLE CITIES INFLUENCING THE ENVIRONMENT WITH POTENTIAL SOLUTIONS (GEO) TRANSPARENCY IN THE EXTRACTIVE INDUSTRIES	
September 01, 2018 – August 31, 2020	
Institute responsible for the Implementation	Secretary of State in the Environment Office Geology and Mines Honduran Institute
Description of the commitment	
What is the problem that the commitment addresses?	Concentrating huge contingents of population, in urban areas of the country impacts on energy consumption, water and generation of pollution, among others. The living conditions in the cities are characterized by presenting large health risks related to the environment, insufficient access to many urban services, poor drainage and sewerage networks, inadequate practices of solid waste management, limited access to transport services and congestion due to overcrowding. The relevance of the urban environment, particularly with respect to the vulnerability that these areas present in the face of natural disasters. The sustainable management development of urban areas with special emphasis on health actions, environmental sanitation and minimization of vulnerability risks in the face of natural disasters.
¿Which is the commitment?	Development of Geo Cities processes, with the due involvement of the government, municipal governments, scientists, lawmakers and the general public in the region, to the effect of promoting a better understanding of the dynamics of cities and their environments, and identifying potential solutions. To train a group of teachers, responsible for the dissemination to their students of the Environmental Education Program with the support of the regional offices of the Secretariat Environment, with orientation to the protection of the environment and consumer production.
¿How will it contribute to solve the problem?	The commitment to achieve the greatest number of GEO processes in the country, promote a better understanding of the dynamics of cities and their environments, supplying municipal governments, scientists, and policymakers and the general public of the region, reliable and updated information about their cities. Recognizing the links between environmental conditions and human resources activities, especially those related to urban development, will contribute in the training of local technical capacities for the integral evaluation of the state of the urban environment. It is important to emphasize that the formulation of implementation of urban strategies and plans to help cities improve their urban environmental management and the creation of institutional networks in the city. On the other hand, the training of teachers at the national level, of the importance of values and protection to the environment, as the basic production of income in their homes, comes to provide a tool to increase the positive impact of school children projects and of young people and their public participation in order to support sustainable development. This initiative tries to encourage and motivate the participation of children and young people in activities related to the environment, providing knowledge and advice, from educational levels to decision-making.
¿Why is it relevant to the values of the OGP?	Transparency; these processes will result in the strengthening of the Institutions (municipal) in the preparation of environmental assessments and integral reports in the cities of the region, in the framework of a transparent, inclusive and participatory process, which will lead to a long-term better informed decisions, greater community participation and better environment management that will improve the quality of life of the people who inhabit the cities in the region. Citizen participation; Guide the creation of consensus on the most critical environmental issues in each city, encouraging dialogue and participation of the all sectors of society in the decision-making process.

Additional Information		The contribution of the GEO Cities project is the development and provision of more precise information on the state of the environment and the analysis of the consequences that the policies have on it to promote effective decision-making directed to achieve a sustainable development and the achievement of the Millennium Development Goals, in this case there is a link with the Sustainable Development Goal number 11 of cities and sustainable communities, which raises actions aimed at getting our cities to be more inclusive, safe and sustainable, likewise the 16th objective whose goals focus on the promotion of peaceful and inclusive societies for sustainable development, access to justice for all and building effective and transparent institutions.

Commitment Template	
20. BUSINESS INTEGRITY WITH HIGH INTERNATIONAL STANDARDS IN AN STRATEGIC ALLIANCE WITH THE GOVERNMENT	
September 01, 2018 – August 31, 2020	
Institute responsible for the Implementation	COHEP- Global Compact (UN), STSS, Mi Ambiente, SDDHH, MACCIH and SCGG
Description of the commitment	
What is the problem that the commitment addresses?	The problem is the need for companies to participate in the fight to combat the issues that afflict the country in terms of decent work, vulnerability to climate change, violation of human rights and corruption; through a comprehensive and transparent process in the application of international standards in the area of; labor, human rights, environmental and anti-corruption. The lack of a clear strategy of the companies on the subject and the need to create alliances with specialized government institutions on the subject.
¿Which is the commitment?	The signing of the Global Compact understanding memorandum, the creation of a network of institutions and companies, the accompaniment of companies in the compliance of the international norms and standards and the linking of this network to international Global Compact networks, all with the due accompaniment of governmental institutions specialized in the theme to create sustainable strategies in consolidating business integrity in the country.
¿How will it contribute to solve the problem?	The application of international standards and good practices by parts of institutions and companies will allow these to contribute with their "stakeholders" (Shareholders, employees, clients, government and community), to improve the standards, the business climate, investment, inclusive economic growth, generation of employment and the quality of life of the Honduran family and especially the integrity of companies and their collaborators with the appropriate support and technical assistance of the governmental institutions. These actions promote the implementation of the 10 universally accepted principles to promote sustainable development in the areas of Human Rights and Company, Labor Standards, and anti-corruption in alliance with the government, which is translated into direct benefits to citizens related with the theme, these actions represent the largest corporate social responsibility initiative in the world,
¿Why is it relevant to the values of the OGP?	Transparency; these actions are relevant because they are developed in a framework practical to create, implement and disseminate sustainability policies and business practices with citizens related to the subject, and with due accompaniment of government institutions specializing in labor issues, human rights, environment and anti-corruption. Citizen participation; It is relevant because in this exercise, the citizen participation is facilitated which leads to the opening of access of information to the consequent well-being of people. Accountability; empower the citizen in his human and labor rights and even environmental and anti-corruption issues, allows the citizen to be in the full knowledge of the rights that assist him and consequently allows them to demand more the fulfillment of their rights if they are being violated, This type of initiatives allows to create mechanism so that companies render accounts of their level of compliance in the related subject.
Additional Information	To fulfill these purposes, COHEP requires the development of alliances and subscription of agreements with government institutions, international

	organizations, such as United Nations, Global Compact, OAS-MACCIH, the High Commissioner of United Nations for Human Rights and the STSS, MI AMBIENTE, SDDHH, SCGG TRANSPARENCIA-ONACE that facilitate the resources of technical assistance training, accompaniment of the companies and monitoring of the program.		
Activities and Deliverable Product		Starting Date	Ending Date:
1. Subscription to the Global Compact Memorandum of Understanding and COHEP to comply with the principles of global compact in partnership (agreement of cooperation) with competent government institutions and focused on the topics of; labor standards (STSS) Environmental (My Environment); Human Rights (SDDHH) and Anti-corruption (SCGG-MACCIH)		September 01, 2018	September 30, 2018
2. Conformation of the Network of Institutions, business Organizations and companies that will make up the global network compact and approval of its work plan and its regulation, with the support of the i governmental institutions specialists in the subject.		September 01, 2018	November 30, 2018
3. Training programs for entrepreneurs and technician staff of the companies for the implementation of the plan of the network, with the involvement of the government institutions with specialists in the implementation of good practices in the themes of labor standards, Environmental, Human Rights and Anti-corruption.		September 01, 2018	August 30, 2020
4. Development of a program of accompaniment to the companies and institutions in the implementation of good practices, by COHEP and specialists of the government until achieving certification by global compact. (Company Approach to Human Rights Plan Project)		January 01, 2019	August 30, 2020
5. Extension of at least 50 companies in the network, coverage and link to global international networks compact, with the due assistance of the competent institutions of the government on labor standards issues, Environmental, Human Rights and Anticorruption.		January 01, 2019	August 30, 2020
6. Encourage the development of regulation agreements, codes of business ethics and programs and areas of compliance in anticorruption.
