Commitment 9 : Increase Côte d'Ivoire government open data impact (open data).....	26
Commitment 10 : Liberalize television space.....	29

CONTENTS

Côte d'Ivoire expects a lot from the Open Government Partnership initiative to promote transparency and good governance in public affairs management, fight against corruption and Citizen's participation and technology innovation.

The country's commitment is reflected in its compliance with obligations incumbent on upon member countries. That's why, both at the level of documents produced periodically and at the level of participating in statutory meetings, Côte d'Ivoire respected OGP's deadlines and recommendations.

In this regards, Côte d'Ivoire participated in all OGP world summits and African regional meetings since it became a member in 2015, as it considers this initiative as an opportunity to share good practices in terms of open governance in the world. OGP is also a chance to promote accountability culture at all levels of responsibility.

For us, this is, above all, a source of hope for citizens in the sense that this partnership provides civil society and private sector with an additional means of expression on issues related to public affairs management.

That is why, through its active participation, Côte d'Ivoire shares experience while benefiting from peer members' good practices.

Locally, the OGP initiative outreach is underway. Various activities co-organized with civil society organizations throughout the national territory demonstrate the full adherence of citizens to OGP, with every time, participants' exceptional mobilization and attendance.

Various stakeholders input during the development of the first 2016-2018 National Actions Plan (NAP), lessons learned from the implementation of this plan, and useful recommendations from the independent assessment report have been of a precious help during the development of the 2018-2020 National Action Plan.

Co-creation is only possible with a shared will and vision between the stakeholders involved. Various supports, comments and recommendations received in spearheading the process are a source of additional encouragement to the Government of Côte d'Ivoire.

This National Action Plan is another way to express this common will and Ivorian actors' determination, that is to say, public administration, private sector and civil society to build together a more transparent Côte d'Ivoire based on more open governance, in Union Discipline and Labor.

INTRODUCTION

Côte d'Ivoire's membership to the OGP initiative in 2015 was followed by the development of its first National Action Plan covering the 2016-2018 period in compliance with OGP authorities recommendations. The formulation of this plan was possible with the determination of Ivorian Authorities, availability and contribution of civil society organizations, private sector, etc.

By the end of September 2017, the mid-term self-assessment report has been published and forwarded to OGP Support Unit. The formulation of this report received input from various actors, especially OGP Technical Committee members, commitment lead implementing agencies and members of the Ivorian OGP civil society platform. This provided an opportunity to assess our progress, to have a self-criticism about the work done by Côte d'Ivoire. This step mainly helped us draw the early lessons in order to continue the process smoothly.

The implementation of the first 2016-2018 National Action Plan was closed since June 30th, 2018.

Various lessons which emanated from the mid-term self-assessment have been supplemented by criticisms and recommendations of the assessment developed by the Independent Reporting Researcher who intervened early in 2018 under the Independent Reporting Mechanism.

Thus, the OGP Technical Committee (OGP TC), as an OGP inter ministerial operational body (CI-OGP) has drawn on this first experience and in compliance with its missions, to launch the development of the second OGP National Action Plan, the implementation of which covers the 2018-2020 period.

EFFORTS MADE BY GOVERNMENT OF CÔTE D'IVOIRE TO DATE

Before joining the Open Government Partnership, Côte d'Ivoire was already involved in various actions in line with the principles of this initiative (Millennium Challenge Corporation, Doing Business, African Peer Review Mechanism (APRM), Extractive Industries Transparency Initiative (EITI), etc.

These actions have been strengthened with the 2016-2018 National Action Plan, the implementation of which resulted in greater awareness and involvement of civil society organizations in the process.

In order to promote a more efficient administration geared to provide better service to the public, the Government of Côte d'Ivoire has identified modernized public administration as a priority. This willingness has led to the official launching of a portal for e-Administrative procedures (<http://www.servicepublic.gouv.ci/>) on September 28, 2017 by the Prime Minister.

In order to unite digital space of all Côte d'Ivoire universities and colleges, the Government of Côte d'Ivoire has established Côte d'Ivoire Virtual University (UVCI, <http://www.uvci.edu.ci>).

Its pedagogical model connects higher education with students in their family unit, so as to solve the problem of the increasing number of students on the university and business schools campuses.

Beyond the commitments of the first National Action Plan several actions have been carried out by the Government of Côte d'Ivoire to promote open government. This includes opening an on line citizen participation platform <http://www.participationcitoyenne.gouv.ci/> to enable citizens of Côte d'Ivoire to directly contribute in improving public services by making proposals accordingly.

The same applies to tele taxation portal (<https://e-impots.gouv.ci/>) enabling tax payers to declare and pay their taxes on line.

Concerning the fight against corruption, the High Authority for Good Governance(HABG) has put on line statistics about asset declarations by high level officials, Ministers and Mmembers of Parliament, on its site since 2017(<http://www.habg.ci/index.php>).

There is also the Public Service Observatory (OSEP) which is a tripartite committee for permanent monitoring. It helps improve the quality of public service and allows to assess the effectiveness and transparency of public service through listening, user's' complaints mechanism and follow-up of their processing.

The One Stop Shop for Foreign Trade (GUCE), <https://guce.gouv.ci/?lang=fr> simplifies and harmonizes trade procedures, fast processing of trade operations, trade facilitation as well as a materialization and travel reduction for various external trade actors..

2018-2020 NATIONAL ACTION PLAN DEVELOPMENT PROCESS

The 2018-2020 National Action Plan formulation process was, like the preceding one, prepared with the participation of several actors. This was done through different activities carried out in close relationship with civil society organizations and Ivorian Civil Society Platform for Open Government Partnership in Côte d'Ivoire.

The preferred approach is built upon training sessions for public consultation actors and discussion workshops between stakeholders.

- Training Sessions

Two training sessions were held from 11-13 April and from 24-25 April 2018 for various actors involved directly in the formulation of the second National Action Plan.

The first training session targeted trainers, that is, persons selected to conduct public consultation sessions for the development of the National Action Plan. These persons were representatives of public administration, and those of the civil society in particular, members of Ivorian Civil Society Platform for OGP. The second training session specifically focused on the use and management of the public consultations digital platform (cp.ogp.gouv.ci), with the same target persons.

These trainings were delivered under the Support Project to Francophone Open Governments (PAGOF), with the financial support of French Development Agency (AFD).

The technical assistance provided within this context was ensured by French Agency for International Technical Cooperation (Expertise France) and French Media Development Agency, CFI.

- **Public consultations**

Assignments for public consultations during the development of the second National Action Plan were jointly conducted by the OGP Technical Committee and the Ivorian Civil Society Platform. Public consultations began early in 2017, through five (05) towns in Côte d'Ivoire, namely, Bondoukou, Agnibilékro, Aboisso, Daloa and Yamoussoukro. They were strengthened and completed by those carried out in 2018 in Bongouanou, Gagnoa, Odienné and Abidjan.

Furthermore, in order to involve the maximum of stakeholders, public consultations in Bongouanou were attended by the following surrounding communities: Anoumaba, Andé, Assié-Koumassi, Abongoua, Arrah, Kotobi and M'Batto.

Likewise, in Gagnoa, communities of Oumé, Ouragahio, Guibéroua and Diegonéfla participated in the activities.

The Abidjan step has helped to consolidate all the other consultation results, which helped to highlight major problems and identify potential lead implementing agencies.

The main target of these meetings was to involve and get the Ivorian Civil Society participate in the conduct of the OGP process in Côte d'Ivoire and more specifically to (i) provide participants' awareness on OGP process (ii) debate over themes of interest and (iii) collect Civil Society's opinion and concerns with a view to develop the 2018-2020 National Action Plan.

These different consultations were followed by the on-line availability of the public consultations digital platform on June 11th, 2018. <https://cp.ogp.gouv.ci/>. Contributions on this platform ended on July 11th, 2018. <https://cp.ogp.gouv.ci/>. Inputs on this platform ended on July 11th, 2018.

- **Establishment of commitments**

Three activities were achieved following the public consultations, namely the two-day workshop held on 6-10 August 2018 in Abidjan and meetings of OGP-TC with lead implementing agencies.

- The first day of the workshop brought together members of the Civil Society Platform who worked on themes collected during various 2017 and 2018 public consultations in order to translate various preoccupations collected in different visited towns into commitments proposals.
- The outcomes of this first day provided a basis for the discussions during the 10 August 2018 activity; it was attended by OGP-TC, Ivorian Civil Society Platform and structures supposed to bear the second plan commitments.

This activity mainly enabled the participants to analyze the commitment proposals in the light of OGP principles and ensure that they could align with Côte d'Ivoire's National Development Plan for projects covering 2018-2020 period.

- At the end of this two-day activity, potential commitments holders were identified ; which enabled the Technical Committee to initiate direct and regular meetings with them.

These sessions enabled various actors to agree on expected information in the different commitments, allowing OGP-TC to provide itself with various commitment projects for the preparation of the National Action Plan draft.

- **Preparation of the Action Plan draft**

The National Action Plan draft development sessions were jointly carried out by OGP-TC, commitment holders, and the Ivorian OGP Civil Society Platform in a workshop held in Abidjan on, Thursday September 27th, 2018.

This activity enabled the participants to agree on the commitment projects and mainly ensure that they are relevant and achievable.

- **Pre-Validation of the National Action Plan**

The plan prevalidation workshop bringing together the OGP-TC, commitment holders and OGP Ivorian Civil Society Platform was held on October 17, 2018 following a 15- day period granted to various stakeholders especially to the civil society to make comments to the Action Plan draft.

- **Focal areas of the 2018-2020 National Action Plan**

This National Action Plan is in line with the National Development Plan dynamics (2016-2020 NDP) the first strategic focal area of which is dedicated to the strengthening of the quality of institutions and governance.

The quality of the institutions is necessary to ensure their credibility. Open and credible institutions are a source of stability because they sustainably build confidence between the State and citizens.

In the management of these matters, taking into consideration several issues is essential in the search for quality and transparency as shared aspirations.

This is the reason why this National Action Plan emphasizes on access to information, budget transparency, plurality of expression, education, fight against corruption, open data, health, and strong citizen involvement as well.

COMMITMENTS

<p>Commitment 1: Develop and publish a citizen's budget as of 2019</p> <p>June 2019-June 2020</p>	
Lead implementing agency/actor	Ministry delegate to the Prime Minister in charge of Budget and State's Portfolio
Commitment description	
What is the public problem that the commitment will address?	<p>A great number of budget documents and information are available through several channels, especially on Administration Internet site.</p> <p>However, these budget and informations documents cannot be easily exploited by the population because of their relative complexity.</p> <p>This situation does not ensure a more active citizen participation in the management of public affairs with a view to more efficiency in public action.</p>
What is the commitment ?	<p>The citizen's budget is a document which aims to briefly show and make easily accessible to the public, data and information in the state budget.</p> <p>This commitment ensures the production and publication of the simplified budget version, each year, with illustrations (pictures).</p>
How will the commitment contribute to solve the public problem?	<p>Its implementation shall enable any citizen to better understand the budget, its operation as well as the Government budget policy decisions.</p>

Why is this commitment relevant to OGP values?	<p>This commitment ensures the improvement of budget transparency by facilitating the public's access to budget information.</p> <p>In fact, the citizen's budget shall provide any citizen with the possibility and opportunity to understand more the state budget and its operation as well.</p> <p>It shall also ensure citizen participation in the management of public affairs.</p>	
Additional information	In the citizen's Budget development process, civil society's participation and involvement are expected.

Commitment 2 : Build 80 community preschools through community or Participative Decentralized Development approach

July 2018-June 2020

Lead implementing agency/actor	Funding Improvement project for education service deliveries (PAPSE)
Commitment description	
What is the public problem that the commitment will address?	In Côte d'Ivoire, the preschool attendance rate is relatively low in rural areas; it is 5% against 30% in urban areas.
What is the commitment?	<p>This includes the building of 80 community preschools over 2018-2020 period through community or Participative Decentralized Development approach. (DDP).</p> <p>This approach empowers the target community once financial resources are transferred to it for the achievement of building or classroom rehabilitation under a Training/Action process ;</p>
How will the commitment contribute to solve the public problem?	<p>A management committee will be in charge of funds, recruiting companies to build and equip classrooms, monitoring construction works and report to the community.</p> <p>This approach shall help build efficiently, quickly and at low cost 80 economic, sustainable and quality community preschools with all amenities (toilets, running water) involving rural community's active participation.</p>
Why is this commitment relevant to OGP values?	<ul style="list-style-type: none"> - The commitment promotes citizen participation; - transparency ; - The construction of classrooms through the community approach shall make the recipient community responsible once financial resources are transferred to it for the building activities under a Training/Action process ;
Additional information	The implementation of the commitment includes recruitment of community teachers supported by the community.

	The project is part of the strategic plan of the 2016-2025 Education Training sector.

Commitment 3: Adopt and popularize a law on the protection of those reporting acts of corruption and related offenses.

15 January 2019 - 30 June 2020

Lead implementing agency/actor	High Authority for Good Governance (HABG)
Commitment description	
What is the public problem that the commitment will address?	The lack of legal means to protect whistle blowers maintains the fear to denounce or participate in the fight against corruption.
What is the commitment ?	<p>The High Authority for Good Governance undertakes to popularize the law related to the protection of whistle blowers after its adoption.</p> <p>The Commitment consists in :</p> <ul style="list-style-type: none"> - making the law adopted; - informing the population on physical, psychological safety guarantees given by the State, if the population agrees to report acts of corruption and related offenses of which it is a victim or witness, - explaining specific arrangements for protecting whistle blowers, - getting the population to report acts of corruption and related offenses. <p>These organizations shall be deployed in the field to continue the law outreach actions.</p>
How will the commitment contribute to solve the public problem?	<p>The implementation of this commitment should result in awareness of citizens about legal arrangements which protect them against retaliations, threats and intimidations from, corrupt actors.</p> <p>The more people feel themselves protected, the better they will participate in combating corruption.</p> <p>The whistle blowers and witnesses may declare the address of the police station, the brigade of gendarmerie, the High Authority for Good Governance to be their registered addresses.</p> <p>Whistle blowers and witnesses may report on a confidential</p>

	<p>basis.</p> <p>Whistle blowers and witnesses as well as their relatives are effectively protected.</p> <p>This commitment will enable the population to be informed on guarantees provided by law in terms of serenity, physical or psychological integrity of persons or their properties and possibly those of families or relatives of these persons, for a cooperation without fear, likely to efficiently contribute to the establishment of the truth.</p>	
Why is this commitment relevant to OGP values?	<p>This commitment improves and strengthens the fight against corruption.</p> <p>Likewise, it is relevant in terms of access to information and citizen participation.</p>	
Additional information	<p>The draft legislation is in process of being adopted by the Parliament.</p> <p>Commitment budget: CFA F 50 000 000 broken down as follows :</p> <ul style="list-style-type: none"> - CFA F 15 000 000 in 2019 - CFA F 15 000 000 in 2020

Engagement 5 : Make effective, assets declaration for public officials and civil servant in compliance with law

June 2018-June 2020

Main implementing agency/actor	HABG	
Commitment description		
What is the public interest issue to be addressed by this commitment?	<ul style="list-style-type: none"> - Corruption illicit Enrichment; - Citizens' mistrust towards executives and high officials ; 	
What is the commitment ?	The High Authority for Good Governance commits itself to increase the rate of registrants from 76.6% in 2018 to 90% in June 2020.	
How will the commitment contribute to solve the government problem?	<p>The High Authority will ensure the registrants' awareness raising as far as asset declaration is concerned.</p> <p>It will ensure that the repressive measures under the law are implemented.</p>	
Why is this commitment relevant to OGP values?	Assets declaration is a powerful deterrent against any form of corruption and establishes a very high professional integrity standard among public servants which are subject to this civic act.	
Additional information	Assets declaration is prescribed by Article 41 of the Constitution of Côte d'Ivoire	
Important activity having a verifiable deliverable	Start date	End date
The High Authority will ensure the registrants' awareness raising as far as asset declaration is concerned.	June 2018	June 2019

Commitment 6: Promote participative democracy in the Ivorian collectivities.	
June 2018-June 2020	
Main implementing agency/ actor	Executive Management of Decentralization and Local Development
Commitment description	
What is the public interest issue to be addressed by this commitment?	<p>Most of the time, public budgets are prepared by elected representatives and their advisors who arbitrate their choice according to many criteria and constraints, hardly known or explained to citizens. This may result within the population in a perception that some lose, and others gain.</p> <p>The population and local authorities receive scarce information on the preparation, implementation, monitoring and assessment of the local budget.</p> <p>The population low involvement and participation in the management of local affairs.</p>
What is the commitment ?	<p>The purpose of this commitment is to :</p> <ul style="list-style-type: none"> - Encourage local authorities to practice participatory budget - improve governance at local level; - stimulate populations' participation in decision-making.
How will the commitment contribute to solve the public problem?	<p>The commitment will enable the authorities to understand the logic of populations participation in budget preparation as well as enable the populations to understand their role in their local budget preparation, implementation and monitoring through awareness raising workshops and sharing good practices;</p> <p>In this regard, local elected representatives will show their political commitment by taking a decision on a municipal council.</p>
Why is this commitment relevant to OGP values?	This commitment is relevant for access to information and citizen participation.
Additional information	<ul style="list-style-type: none"> - This commitment enjoys a budget of CFA F 864,499,200; - This commitment is in line with 2016-2020 NDP in its axis 4, effect 2 and with 20191 PIP.

Commitment 8 : Integrate the distribution of contraceptive products into the minimum health care activity package of 4000 community health care workers by 2020.

July 2018-June 2020

Main implementing agency/actor	National Mother and Child Health Program (PNSME)
Description de l'engagement	
What is the public interest issue to be addressed by this commitment?	The commitment will address the issue of low contraceptive prevalence.
What is the commitment ?	Integrate the distribution of contraceptive products into the minimum health care activity package of 4000 community care health workers by 2020. These community health care workers are selected the populations themselves.
How will the commitment contribute to solve the public problem?	The Community healthcare workers (ASC) continue health workers actions within the community. They already provide promotion, prevention and home based care services (malaria, diarrhea, acute respiratory infections). Include family planning in these services will allow to get service offer closer to populations and improve the contraceptive prevalence.
Why is the commitment relevant to OGP values ?	The commitment promotes citizen participation with the involvement of community health care workers.
Additional information	<ul style="list-style-type: none"> - Building the capacity of all community health care workers (Training and equipment) for contraceptive products resupply. - The implementation of a pilot study to delegate tasks concerning prescription of short acting contraceptives by community health care workers in the three medical districts. - The assessment of the pilot phase to delegate tasks concerning prescription of short acting contraceptives by community health care workers in the three medical

	districts - This commitment is part of the PF 2015-2020 budgeted National Actions Plan which in line with 2016-2020 SDNP and 2016-2020 NDP ; - This commitment is part of Côte d'Ivoire's commitment in the framework of Ouagadougou and FP 2020 initiative commitments.	
Important activity having a verifiable deliverable	Start date	End date

Commitment 10 : Liberalize television space	
July 2018-June 2020	
Main implementing agency/ actor	Ministry of Communication and Media
Commitment description	
What is the public interest issue to be addressed by this commitment?	<ul style="list-style-type: none"> - limited liberalization of television sector ; - limited expression plurality; - insufficient stimulation of a creative and competitive ecosystem; - low level of Ivorian audiovisual works.
What is the commitment ?	<p>To ensure that liberalization is as meaningful as possible, the commitment will consist in:</p> <ul style="list-style-type: none"> - constructing a building to host the network head; - making the signal available to enable all TNT channel editors to broadcast.
How will the commitment contribute to solve the public problem?	<p>The liberalization of the audiovisual sector is a process to foster cohesion and openness of the media playing a key role in the construction of a balanced, operational and socio educative public sector.</p> <p>The triad of "Inform, Educate, entertain" therefore make sense with the emergence of Ivorian operators having national and regional editorial offer to create a close link around information in the areas of agriculture, economy, health, transport or education.</p> <p>by opening the audiovisual landscape, the Government ensures diversity of opinions (diversity of contents and editorial lines), strengthens the right to information.</p> <p>There are 7 channels which shall broadcast in other words, on TNT network as early as 2018 over more than half of the territory (100% covered at the end of 2019).</p>
Why is this commitment relevant to OGP values?	<p>this commitment is relevant as it allows to:</p> <ul style="list-style-type: none"> - encourage access to information - Guarantee freedom of expression; - diversify audiovisual contents
Additional information	the liberalization has been achieved: a call for tender was

		<p>launched in 2016 by the High Authority of Audiovisual Communication (HACA)</p> <p>HACA has selected four (4) TNT channel operators and two (2) satellite package operators. In 2017, the law on legal regime of audiovisual communication has finalized the process.</p> <p>The national broadcasting operator, Ivoirienne de Télédiffusion, was established late 2017 in order to ensure its deployment.</p>
