Dear Ms von Bertele,

Escuelab.org is a social enterprise that was born in 2008 in Perú, to allow local communities the access to an infrastructure, low cost technologies and peer learning experiences that would enable technological co-creation. Since our beginnings, we have held a variety of workshops, meetups, hackathons using open data, public data and projects with a high dedication to local cultures and their technology appropriation processes. Among other things, in October 2015 we helped the regional government of La Libertad organize the first regional hackathon ever held in Perú.

In this regard, recognizing the importance of this call for proposals as a chance to work in mutual cooperation with the OGP, the regional government of La Libertad, the Secretaria de la gestión pública and other public and civil institutions to strengthen our respective public administration systems, we wish to express our willingness to cooperate in the design and implementation stages of the project, as well as to give our support in all other activities that will require our participation.

Without further ado, I avail myself of this opportunity to renew the assurances of my highest consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "Enrique Mayorga González". The signature is fluid and cursive, with a prominent loop at the end.
