## Background

**Open Government Partnership** (hereinafter referred to as "OGP") is a multilateral initiative that aims to secure concrete commitments from governments to promote transparency, empower citizens, fight corruption, and harness new technologies to strengthen governance. To progress further in this goal, OGP acknowledges the opportunities presented by engaging in open government on the local level. OGP has grown to include a network of 7676 local governments, 78 countries, and thousands of civil society partners committed to local, national, and global action on transparent, participatory, inclusive and accountable governance.

**Congress of Local and Regional Authorities of the Council of Europe** (hereinafter referred to as "the Congress") is an institution of the Council of Europe, responsible for strengthening local and regional democracy in its 46 member states and assessing the application of the European Charter of Local Self-Government. As the voice of Europe's municipalities and regions, it works to foster consultation and political dialogue between national governments and local and regional authorities. It has 306 representatives and 306 substitutes, all appointed for five years, representing over 130,000 local and regional authorities. The Congress has reinforced co-operation and partnerships with member states and other institutions and European associations in order to consolidate local and regional democracy.

**Association of Ukrainian Cities** (hereinafter referred to as "AUC") is the most representative national association of local authorities of basic level in Ukraine advocating for local government rights and participating in the policy dialogue with state authorities at all levels on behalf of local authorities. Since its creation in 1992, the AUC has been actively engaged in strengthening local democracy, the legislative framework for local self-government and fiscal decentralisation. Today, the AUC unites approximately 986 representative bodies of local self-government, which represent more than 85% of the Ukrainian population lives.
