Results Report: Romania 2020-2022
Comments Received

Comments Received from Bogdan Voicu (20 June 2023)

Comment on Section I: Key Observations
The readability would be highly increased if the endnotes would be converted into footnotes.
Before anything, a list of commitments should be provided, otherwise the reader is only guessing what the report discusses.
Comment on Section II: Commitment 12
This comment is based as indicated by the footnote on a single opinion. It needs better documentation.
Is there any association between the number of datasets that were supposed to be published and the percentage of datasets that were published? A scatter-plot labeled with the acronyms of the organizations would help in this respect.
Can one show a trend by year (or even better: quarter)?
Comment on Annex I: Commitment 10
On page 8, last phrase seems to suggest a substantial potential for results in this field. Is my reading wrong?
