

GUBERNUR NUSA BARAT

FOREWORD ACTION PLAN DOCUMENT OPEN GOVERNMENT PARTNERSHIP (OGP) LOCAL WEST NUSA TENGGARA PROVINCE

Assalamu'alaikum Warahmatullahi Wabarakaatuh

Thank you for the support and contribution of Mr/Mrs and all colleagues, both from government elements and social organizations involved in the preparation of this NTB Open Government Partnership (OGP) Regional Action Plan Document. Alhamdulillah, hopefully we are all in good health, because until now we are together fighting against the Covid-19 pandemic, and as we all know that the condition of our area of Covid-19 cases is increasing and become a warning to all of us that the most important thing is the enforcement of health protocols. So I invite on this good opportunity to all parties and society in general to be able to massively campaign We Must Wear a Mask, this is our collective homework.

The Provincial Government of West Nusa Tenggara and West Sumbawa Regency are one of the few local governments participating in Local OGP. Not all Regional Governments can participate in this Local OGP, so we must take advantage of this opportunity as well as possible, so whatever program we initiate, be it NTB Care, NTB Satu Data (NTB One Data), Posyandu (Integrated Healthcare Center) Information System, and programs initiated by the West Sumbawa Regency Government about how “gotong royong” (mutual cooperation) is important, these are things that must be fought for. This means that essentially these programs are really useful for the public.

With NTB Care we can build two-way communication between the local government and the community, the government cannot build without the participation of the community, this will be a forum that can bridge between the government and the community, that's NTB Care. Our homework in the government is how to respond as quick as possible to whatever conveyed by the community, so that the regional apparatus must be truly responsive to everything that is conveyed by the community for the success of the NTB development. Then the Posyandu Information System is here because we understand very well how important health, social, and economic problems are. We also understand that education is one of our problems, many things happen due to lack of education, so we make the Posyandu Information System a hamlet-based education center where we hope that health, social and economic problems can be educated

through the Posyandu Information System and reported with good so the data can be summarized in the Posyandu Information System and can be our material to overcome various problems that exist in NTB. Then there is NTB Satu Data and we are all know how the problems in NTB are sometimes due to lack of data accuracy. Many regional apparatuses sometimes execute programs that the data base is inaccurate, this should no longer happen in the future, there must be a single data that becomes the basis for regional apparatuses to move and make policies in their programs. NTB One Data also have to really be able to succeed. We hope that all programs participating in this Local OGP are present to provide solutions for us as a nation and state in building this NTB.

Likewise, what I saw in West Sumbawa Regency, “gotong royong” could be a strength that other regencies/cities could emulate. We remember that when the earthquake occurred in 2018, the West Sumbawa Regency Government had a quick response to disaster management because there was already a culture of mutual cooperation that had grown, there was already had an initiation, so when the earthquake occurred happen, the Sumbawa Regency Government are immediately moved.

I hope this Local OGP Action Plan is really effective, all commitments can be implemented and all existing programs can be felt by the community. I also hope that our involvement in this Local OGP will bring blessings and wisdom to NTB Province and West Sumbawa Regency.

Wassalamu'alaikum Warahmatullahi Wabarakaatuh

DEPUTY GOVERNOR OF WEST NUSA TENGGARA,

Dr. Ir. Hj. SITTI ROHMI DJALILAH, M.Pd
