South Cotabato expands biodiversity corridors to strengthen ecosystem balance

📍 Clarisse Mae Retirado-Jimenez 📅 April 21, 2025

The Provincial Government of South Cotabato is intensifying its efforts to expand biodiversity corridors across the province, a strategic environmental initiative aimed at securing water supply, boosting agricultural productivity, and reducing disaster risks for local communities.

As part of this initiative, a recent site visit was conducted covering a total of 39.62 hectares of previously and newly planted rattan areas under the province's
